

INDUSTRIAL STEAM IRON

HI-550P

■ FEATURES

- Due to the heater being die casted into the aluminium soleplate, durability is guaranteed.
- The one press electro magnetic switch delivers continuous steam.
There is no need to hold the switch down for long periods of time.
- The steam vent, steam passage and steam generating chamber are all very easily cleaned by simply removing the cover.
- The thermostat is a liquid expansion type, therefore very durable.
- The soleplate surface is hard alumite with the heater die casted in, making for high thermal efficiency.
- No boiler is needed because of the economical water drip system.
- A highly stable EP (ethylene, propylene) rubber power cord is used.
- The iron can be used by dry or with steam.

■ SPECIFICATIONS

MODEL	HI-550P	
ELECTRIC CAPACITY	● 120V-1,200W	
	● 220V-1,200W	
	● 230V-1,100W	
DIMENSIONS	W	110mm
	D	260mm
	H	150mm
NET WEIGHT	2.4kg	
WATER TANK	about 3.0 l (3,000cc)
