

MODULAR FLOORING

Arena offers 4'x4', 2'x4' and 1'x4' modular flooring with a painted plywood top enclosed in a steel frame.

The flooring is available in 5", 16", 24" and 32" standard leg heights. Custom heights are available depending on your specific event needs.

Modular flooring can be installed over any contour or surface and is leveled with shims. It can be covered with carpet or turf, vinyl goods, engineered wood flooring, laminate tile, "sport court" or other custom options for a finished appearance.

Arena also offers ADA compliant ramps, stairs and hand rails.
