Limiting the Scope of Review on Redeterminations and Reconsiderations of Certain Claims

Provider Types Affected

This MLN Matters® Special Edition Article is intended for physicians, providers, and suppliers who submit claims to Medicare Administrative Contractors (MACs) for services provided to Medicare beneficiaries.

What You Need to Know

This Special Edition article is being published by the Centers for Medicare & Medicaid Services (CMS) to inform providers of the clarification CMS has given to the MACs and Qualified Independent Contractors (QICs) regarding the scope of review for redeterminations (Technical Direction Letter-150407). This updated instruction applies to redetermination requests received by a MAC or QIC on or after August 1, 2015, and will not be applied retroactively.

Background

CMS recently provided direction to MACs and QICs regarding the applicable scope of review for redeterminations and reconsiderations for certain claims. Generally, MACs and

QICs have discretion while conducting appeals to develop new issues and review all aspects of coverage and payment related to a claim or line item. As a result, in some cases where the original denial reason is cured, this expanded review of additional evidence or issues results in an unfavorable appeal decision for a different reason.

For redeterminations and reconsiderations of claims denied following a post-payment review or audit, CMS has instructed MACs and QICs to limit their review to the reason(s) the claim or line item at issue was initially denied. Post-payment review or audit refers to claims that were initially paid by Medicare and subsequently reopened and reviewed by, for example, a Zone Program Integrity Contractor (ZPIC), Recovery Auditor, MAC, or Comprehensive Error Rate Testing (CERT) contractor, and revised to deny coverage, change coding, or reduce payment. If an appeal involves a claim or line item denied on a pre-payment basis, MACs and QICs may continue to develop new issues and evidence at their discretion and may issue unfavorable decisions for reasons other than those specified in the initial determination.

Please note that contractors will continue to follow existing procedures regarding claim adjustments resulting from favorable appeal decisions. These adjustments will process through CMS systems and may suspend due to system edits. Claim adjustments that do not process to payment because of additional system imposed payment limitations, conditions or restrictions (for example, frequency limits or Correct Coding Initiative edits) will result in new denials with full appeal rights. In addition, if a MAC or QIC conducts an appeal of a claim or line item that was denied on post-payment review because a provider, supplier, or beneficiary failed to submit requested documentation, the contractor will review all applicable coverage and payment requirements for the item or service at issue, including whether the item or service was medically reasonable and necessary. As a result, claims initially denied for insufficient documentation may be denied on appeal if additional documentation is submitted and it does not support medical necessity.

This clarification and instruction applies to redetermination and reconsideration requests received by a MAC or QIC **on or after August 1, 2015**. It will not be applied retroactively. Appellants will not be entitled to request a reopening of a previously issued redetermination or reconsideration for the purpose of applying this clarification on the scope of review. CMS encourages providers and suppliers to include any audit or review results letters with their appeal request. This will help alert contractors to appeals where this instruction applies.

Additional Information

You can find out more about appealing claims decisions in the “Medicare Claims Processing Manual” (Publication 100-04, Chapter 29 (Appeals of Claims Decisions), Section 310.4.C.1. (Conducting the Redetermination (Overview)) at <https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/clm104c29.pdf> on the CMS website.
