<b>4. FIRST-AID MEASURES</b>
------------------------------

**Eye:** None expected under normal handling and use. If contact occurs with filter pellets, immediately flush eyes with large quantities of water for at least 20 minutes, holding the eyelids apart. Get immediate medical attention.

**Skin contact:** None expected with normal use. If contact with the filter pellets occurs, remove contaminated clothing. Wash skin with soap and water. Get medical attention if irritation develops.

**Inhalation:** None expected with normal use. If dust from tablet is inhaled, remove to fresh air. If irritation develops or if breathing is difficult, get medical attention.

None expected with normal use. If filter pellets, or dust is swallowed, do not induce vomiting. If conscious, rinse mouth with water. Never give anything by mouth to an unconscious or convulsing person. Get immediate medical attention.

**Most important symptoms/effects, acute and delayed:** None expected under normal conditions of use. The following applies to contact with the table if the coolant filter is broken and the tablet is exposed: Eye contact may cause severe irritation or burns. Permanent damage may occur. May cause skin irritation. Inhalation of dust may cause mucous membrane and respiratory tract irritation. May be harmful if inhaled. Toxic if swallowed. Swallowing may cause burns to the digestive tract, central nervous system effects, cyanosis, convulsions and collapse.

<b>5. FIRE-FIGHTING MEASURES</b>
----------------------------------

**Extinguishing Media:** Use water fog, foam, dry chemical or carbon dioxide to extinguish.

**Specific hazards arising from the chemical:** The tablet is not flammable or combustible. The tablet contains potassium nitrate and sodium nitrite which are oxidizers and can enhance the burning of other materials. Combustion may produce oxides of carbon, nitrogen, molybdenum, phosphorus and sodium.

**Special protective equipment and precautions for fire-fighters:** Firefighters should wear positive pressure self-contained breathing apparatus and full protective clothing. Cool fire exposed containers and structures with water. This material is toxic to aquatic organisms. Fire water contaminated with this material must be contained

<b>6. ACCIDENTAL RELEASE MEASURES</b>
---------------------------------------

**Personal precautions, protective equipment, and emergency procedures:** Use appropriate protective clothing and equipment during clean-up.

**Environmental hazards:** Avoid release into the environment. Report spill as required by local and federal regulations.

**Methods and materials for containment and cleaning up:** If filter is not damaged, pick up and keep for use. If the filter is damaged and the tablet is released, collect in a manner that minimizes the generation of airborne dust. Place collected material into suitable containers for disposal.

<b>7. HANDLING AND STORAGE</b>
--------------------------------

**Precautions for safe handling:** Handle filters in a manner that minimizes the risk of damage and release of contents. In handling damaged filters, avoid generating and breathing dusts. Prevent contact with eyes. Avoid contact with skin and clothing.

**Conditions for safe storage, including any incompatibilities:** Store in a cool, dry, well-ventilated area away from combustible materials, acids and other incompatible materials

<b>11. TOXICOLOGICAL INFORMATION</b>
--------------------------------------

**Potential Health Effects:** Handling undamaged filters will not result in adverse effects. The following information pertains to exposure to the coolant treatment tablets.

**Eye contact:** May cause severe irritation or burns with redness, tearing and pain. Permanent damage can occur.

**Skin contact:** May cause irritation. Sodium nitrite may be harmful if absorbed through the skin.

**Inhalation:** Dust may cause irritation of the mucous membranes and upper respiratory tract. Absorption may cause effects similar to those described under ingestion.

**Ingestion:** Toxic if swallowed. May cause burns to the mouth and throat, dizziness, nausea, vomiting, low blood pressure, cyanosis, rapid heartbeat, convulsions and collapse.

**Chronic effects:** Prolonged or repeated exposure may cause nervous system effects, liver damage, kidney damage and effects on the blood.

**Reproductive Toxicity:** None of the components have been shown to cause reproductive toxicity.

**Carcinogenicity:** Molybdenum compounds have been shown to cause cancer in laboratory animals. In a two year study in mice, molybdenum trioxide showed some evidence of carcinogenic activity in male and female mice based on increased incidences of alveolar/bronchiolar carcinoma and adenoma or carcinoma. A two year study showed equivocal evidence of carcinogenic activity in male rats based on a marginally significant positive trend of alveolar/bronchiolar adenoma or carcinoma (combined). There was no evidence of carcinogenic activity of molybdenum trioxide in female rats. Soluble molybdenum compounds are classified by ACGIH as A3 (confirmed animal carcinogen with unknown relevance to humans). None of the other components of this product present at 0.1% or greater are listed as carcinogens by ACGIH, IARC, NTP or OSHA
