

For Immediate Release

APPLIED ACOUSTICS SYSTEMS RELEASES TASSMAN 4.1 UPDATE WITH UNIVERSAL BINARY AND RTAS PLUG-IN SUPPORT

With the release of Tassman 4.1, Applied Acoustics Systems is happy to announce that the transition to support Intel-based Mac systems is now over! All of their Professional and Session Series instruments are now available on Mac OS X as Universal Binaries.

The Tassman 4.1 Update includes Intel-based Mac system support, RTAS plug-in on both Mac OS X and Windows, and several bug fixes.

Pricing and Availability

Windows and PowerPC-based (G4 and G5 processors) Mac OS X Tassman users can update free of charge. Intel-based Mac OS X Tassman users can get the Universal Binary version of Tassman direct from the AAS Store for \$29.

About Applied Acoustics Systems

Based in Montréal, Applied Acoustics Systems specializes in software based synthesis tools for professional musicians and sound designers. Since releasing the first virtual instrument based on physical modeling, the Tassman, AAS has come to be recognized as the industry leader in this exciting new field of synthesis.
