

**Famous SRST Quotes:
Any Reason Not To. . .
Why Not. . .**

Biochar/Carbon

- In bank treatments: mats, mixed – what does this mean for finishing up microcosm research?
- In stream bed (think about construction process for this)

Expert Panel construct has played itself out?

- What kind of collaborative structure can help guide implementation (including design)?
- Engaging Waynesboro is our first shot at working with landowner

Cofferdams/impervious dikes

Do not remove coffer dam until work area is stabilized
