If you're in the market for an online piano method, chances are you've come across Pianoforall and its promise to help you play piano like a pro in no time. With over 450,000 students worldwide, Pianoforall has made quite an impact with its unique chord-based approach and emphasis on practical skills. In this review, we'll delve into the details of the course, analyze its curriculum, discuss its pros and cons, and ultimately help you decide if it's worth all the hype.

What You'll Need

Before we jump into the specifics of Pianoforall, let's start by addressing the equipment and technical requirements. To fully engage with the course, you'll need access to a piano or keyboard. While the course allows some flexibility in terms of the instrument you use, we recommend starting with a 61-key keyboard at the very least. However, if you're serious about learning the piano, we strongly recommend upgrading to an 88-key digital piano with fully weighted keys for a more authentic playing experience.

In terms of technology, you'll need a device capable of opening and reading e-books in the .epub format, which is the primary format used by Pianoforall. Whether you have a Mac, PC, iPhone, iPad, or Android device, you can download the e-books and access the course content. Pianoforall suggests using the 'Kotobee reader' app for Windows and Android, as well as the 'Books' app for Mac products.

Alternatively, there is also an option to download the course material in .pdf format. The website provides detailed instructions and troubleshooting tips to ensure a smooth setup process.
