

# BACHELOR OF SCIENCE IN FORENSIC SCIENCE

## CONCENTRATIONS

**Biology**

**Chemistry**

**Career Paths**

Biologist

Computer Scientist

DNA Analyst

Drug Analyst

Engineer

Fingerprint Analyst

Firearms Analyst

Forensic Weather Analyst

Forensic GCMS Technician

Medical Examiner

Odontologist Pathologist

Physical Anthropologist

Questioned Documents Analyst

Serologist

Toxicology Analyst

Trace Evidence Analyst

If you pursue a BS in Forensic Science degree, you will be able to:

- Demonstrate your understanding of forensic science professional practices related to ethics, evidence identification, quality assurance, and processing.
- Showcase your technical mastery of laboratory skills within your selected concentration.
- Analyze, comprehend, and explain relevant scientific phenomena associated with forensics and your chosen concentration.

## BUILD YOUR FOUNDATION ON FORENSIC SCIENCE.

Blood spatter analysis. Fingerprinting. Toxicology. Organic chemistry. These are just a few of the areas you'll explore in SWU's Forensic Science program—the application of scientific principles to criminal and civil investigations. Here, you'll be mentored by a Forensic Chemist with over 20 years of law enforcement experience, developing a solid knowledge base and hands-on laboratory skills that prepare you for a variety of roles in the forensic field.

You'll gain practical experience using forensic analysis tools in both lab and research settings, and you can tailor your degree with one of three concentrations—Biology, Chemistry, or Computing—depending on your specific interests and career goals. SWU is the only four-year Christian college in South Carolina offering this unique program, integrating faith and ethics into every aspect of your studies. You'll also have opportunities for internships at local, state, or national agencies, expanding your professional network and real-world skillset.

What will you uncover with a BS in Forensic Science degree?
