UNDERSTAND THE HUMAN MIND, BODY AND SOUL.

A BS in Psychology will help you understand why people are the way they are—what makes them tick, their personalities, their mindsets, and their lifestyles—and enable you to use that knowledge to conduct research and help people solve their problems. If that sounds intriguing, a Psychology degree from SWU is for you. Our holistic approach to psychology is grounded in a Christian worldview that will prepare you for a career or graduate study, and you can complete internships to get real-world experience before graduation.

The Psychology program includes courses on central principles and theories in psychology, as well as multiple concentrations so you can customize your major. As a senior, you can take dual credit courses that count towards both the BS and an MS in Counseling Psychology, enabling you to complete both degrees in 5.5 years.
