November 2026

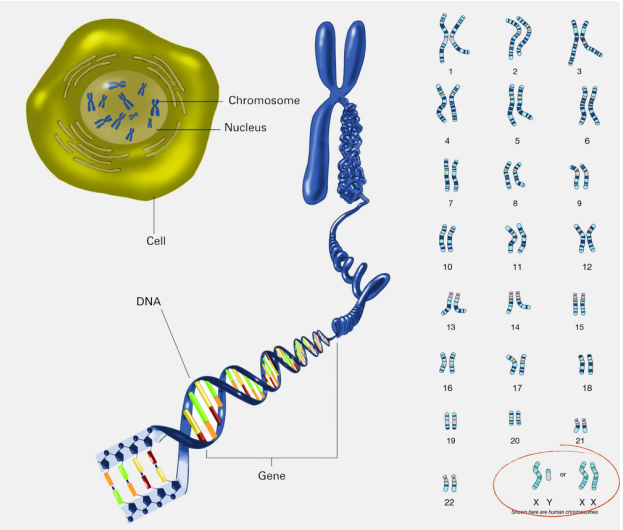

Dear Friend of Creation,

Bashir (not his real name) prayed regularly at his local mosque in a certain Central Asian country. When his younger sister became a Christian, he had wanted to kill her, but fortunately decided not to. After some years, she challenged him to read the entire New Testament and compare it to the Quran. When he got through reading both, he realized he didn't really believe the Quran, and he greatly admired Jesus – but could not reconcile how Jesus could be the Son of God.

So one day **he cried out to the Lord in desperation to show him the truth**, and then fell asleep. When he awoke, he said he suddenly noticed how beautiful creation was. He felt that God was an exquisite painter of nature! Bashir also soon noticed a new purity of heart in himself, unable to lie to customers in the business of his resale shop. He realized his mind and heart had changed, and he had become a believer in Jesus Christ! Though many friends left him, his wife stayed and also read the New Testament and had her own wonderful faith experience. Together they serve as leaders and church planters in their difficult corner of the world (1).

The Bible is true when it says, "The Lord is near **to all who call on Him**, to all who call on Him in truth" (Psalm 145:18), as did Bashir. The Bible is true when it says, "Faith comes by hearing, and hearing by the word of God" (Romans 10:17), as it did to Bashir. And the Bible is true when it tells us that we can see and even understand truths about who God is "through what has been made (in nature/creation)" – as Bashir finally did (Romans 1:20, Psalm 19:1, Isaiah 6:3).

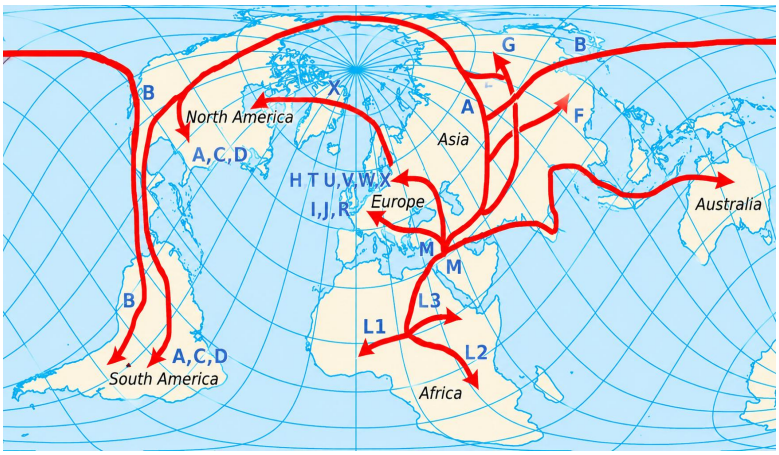

Indeed, science, the study of nature, continues to try to play "catch up" with the Bible. For example, those ancestry tests which you've read about or utilized for your own family research are based on genetic understanding that supports precisely what the Bible has taught since ancient times. The tests use Y-chromosome genomes found only in males and passed on only by fathers, to work back to areas of the world most ancient in our DNA. On this basis, geneticists have coined the phrase, Y-chromosome "Adam" (the Y-chromosome is in the 23rd pair of chromosomes in a human cell; see illustration).

There are 46 chromosomes in a human cell, 23 from a father and 23 from a mother, joining in 23 pairs. Also, the Y-chromosome is composed of approximately 60 million "base-pairs" of nucleotides forming the ladder rungs in the DNA strands of each chromosome – kind of like a "parts list" (see above illustration lower left). And 3 billion base-pairs make up all the DNA in a human cell, famously and finally "mapped" and "sequenced" in the "Human Genome

Project" launched in 1990 and completed in 2003. Each nucleotide pair is subject to mutations, and researchers think a normal average number of mutations per chromosome is 2 mutations per generation, applying 30 years per generation. In this way, they are able to estimate time.

The further a mutation goes back in history, the more common it is because it will have had longer to replicate itself in humans. So, studies have gathered Y-chromosome DNA from diverse men whose families and ancestors come from different regions of the world – men in the Americas, men in East Asia, others in Europe, South Asia, and Africa, for example, cataloging their genes. The Y-chromosome signatures can then be grouped in spreadsheets according to the more common mutations called "haplogroups", named by codes beginning with the letters A through T. Lo and behold, in such a grouping of the most common mutations of men from all over the world, **there happen to be three main groups of ancient ancestors** (2)!

Indeed, the Bible tells us that there are three "founding fathers" of all the people alive today in the world – Shem, Ham, and Japheth – the three sons of Noah. Genesis 10, the famous "Table of Nations", tells us that "by these (the families of the sons of Noah – Shem, Ham, and Japheth) were the nations divided (dispersed) in the earth after the flood" (Genesis 10:32). The most ancient mutation groups in the base-pair nucleotides fall into three original sets – just as would be expected according to Genesis 10, written thousands of years ago! If Noah populated the world through three sons, their sons, grandsons, and great-grandsons, etc., successive generations would generate new mutations that would form a human family tree (a tree of ancestors), known as a "phylogenetic tree" to geneticists – all derived from the three sons. **The deciphering of the human genome has uncovered this biblical truth.** Noah's own Y-chromosome is also known because it would be that of his three sons with all mutations removed. This is all quite remarkable!

There are seventy "families of the sons of Noah" mentioned in Genesis 10, with incredible linguistic correlation to nations of the ancient world. Some being thousands of miles away from their original habitation, testifying to the truth of their dispersal from and around the Fertile Crescent. Scholars have remarked at the accuracy of this "Table of Nations" of the ancient world through the founding patriarchs in the bloodline of Noah – another remarkable testimony to the truth of the Bible.

The Bible is correct, while evolution is simply a vain pseudo-science. "God …hath made of one blood all nations of men for to dwell on all the face of the earth" (Acts 17:24-26). This "one blood" migrated to all parts of the earth according to the genetics of the founding families of the sons, grandsons, great-grandsons, etc, of Noah.

And it did so from the Middle East. The "out of Africa" myth is now considered highly "unlikely" (3). This also agrees with the Bible, telling us that Noah and his family came out of the Ark after the Flood in "the mountains of Ararat" (Genesis 8:4), just north and upriver from where the nations would disperse at the Tower of Babel in the fertile "land of Shinar (Sumeria)", the country of two rivers (Tigris-Euphrates) in Mesopotamia (Genesis 11:2). Indeed, Sumeria is known among archeologists as the earliest ancient civilization, with the earliest known writing. They agree that it sprang up only a few thousand years ago with a high degree of civilization and within only a short time frame from other ancient cradles of civilization, also surprisingly advanced. **Just as the Bible teaches!**

If you don't yet have the book *Traced: Human DNA's Big Surprise,* now would be a good time to check out our Autumn Sale, where you can get it in a discounted offer. In this landmark book of Creation Science corroborated by genetics, Dr. Nathaniel Jeanson traces the genetic history of mankind and its biblical trajectory, and points out how it also corroborates a biblical timeline! He writes, for example, "…males today should be able to dial their Y-chromosome differences back to zero – to Noah – in just 4,500 years... Long story short, the most plausible scenario at present is one in which these dates (beginning dates) are bunched up near 2,500 B.C." (4).

As we move into the **Thanksgiving Holiday** and on into **Christmas**, we are most thankful for the grace and truth of the Word of God – "written" and "living" through Jesus Christ our Lord. We are thankful that **people like Bashir are able to hear and read the truth of the Bible and of Jesus, and how God has revealed Himself in so many ways spiritually, and through the undeniable truths of creation!**

We are also thankful that our new weekend format 15-minute missionary radio program, begun this October, is now being heard in English in Europe, the Middle East, and North Africa on European Gospel Radio! We invite you to listen through the QR code or by visiting the broadcast archive on our website.

And **in January, we plan to start broadcasting our daily radio program in Arabic** on Trans World Radio, also in North Africa, the Middle East, and parts of Europe. This is another expansion of our programming, which has been producing spiritual fruit in the lives of its grateful listeners, reaching into regions of the world where there is much resistance and animosity to Christianity. We invite you to give specifically toward this project!

Here is **a testimony from one of our listeners in India**, where we have been broadcasting our Creation Moments radio program in English and in Hindi for several years:

> "Thank you for the radio program. I have received the Lord Jesus Christ and am growing in him, and I am very happy to listen to this blessed radio program. Please pray for my spiritual growth and my family, and especially for my husband and children to come to be saved by the Lord Jesus Christ."

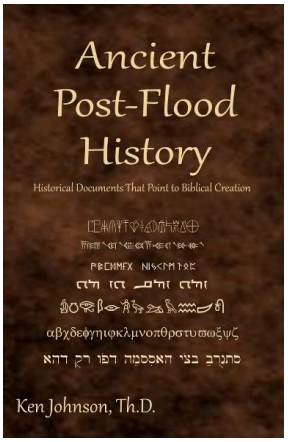

We all have much to be thankful for, in spite of disappointments, irksome frustrations, setbacks, and infirmities – especially if we know the Lord, and place our hope and trust in Him – "which hope", the Bible says, "we have as an anchor of the soul, both sure and steadfast, and which enters into that within the veil", because Jesus has entered before us on our behalf as our great and eternal High Priest (Hebrews 6:19-20)!

This Thanksgiving we are also especially thankful for you! For your prayers and support, as we co-labor to flood the world and flood the airwaves with the truth of Jesus Christ, our Savior, and how **creation testifies of Him!** And we pray for you, our supporters, in our staff meetings. Thank you, and God Bless You!

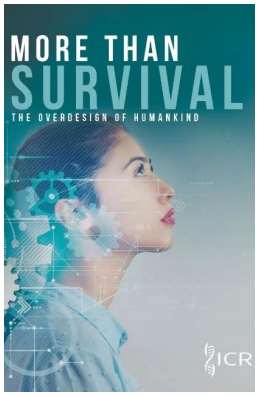

Yours in Christ,

Mark Cadwallader, Board Chairman

4. Jeanson, N.T., *Traced: Human DNA's Big Surprise,* pg 69, Master Books, 2022

P.S. Biblical creation science tracks with and corroborates biblical history, and this month I am excited to offer *Ancient Post-Flood History: Historical Documents That Point to Biblical Creation,* by Ken Johnson. This book is a Christian timeline of ancient post-Flood history based on Bible chronology, the early church fathers, and ancient Jewish and secular history. It also teaches the background history of many countries and people groups. It answers interesting questions such as: Where did Shem and Ham rule, and where were they buried? How large was Nimrod's invasion force that set up the Babylonian Empire, and when did this invasion occur? What is Nimrod's name in Persian documents? How can we use this information to witness to unbelievers? It's a wonderful companion guide in the study of creation science, and a fabulous gift for those interested in Biblical history!

I also want to recommend the DVD, *More Than Survival: The Overdesign of Humankind*. Evolutionists argue that life emerged by chance over long periods of time. Upon closer examination, however, it becomes clear that biological systems exhibit the unmistakable characteristic of finely tuned engineering. Nowhere is this more evident than in the human body! Join Dr. Stuart Burgess as he explores several exquisitely fashioned features that not only demonstrate the efficiency of human design but also reflect the image of our Creator.

To receive either of these items – or to make a donation of any amount – return the enclosed reply card or call us toll-free at 1-800-422-4253 during regular office hours (Mon – Th 8:00am-4:00pm CT). Or visit us online at creationmoments.com, go to the Store, and click Newsletter Resources.

And don't forget our **Autumn Sale going on now through Thanksgiving!** Visit our online store for great deals on recent Creation Moments resources, along with discounted book bundles for the whole family.

HAPPY THANKSGIVING!

The year was 1637, and pastor Martin Rinkart was busy with 40-50 funerals a day! Eilenburg, Germany, had become a besieged and overcrowded refuge for the surrounding area during the Thirty Years' War. People were dying of starvation and disease. Of the four original ministers in the city, one had escaped for healthier duties, and two others had succumbed to the pestilence. This left Pastor Rinkart on his own to care for the people. His wife died in May, and in the midst of these circumstances, Pastor Rinkart amazingly wrote a wonderful hymn, sung for Thanksgiving to this very day...

"Now thank we all our God, With hearts and hands and voices.
Who wondrous things hath done, In whom this world rejoices.

Who from our mothers' arms, Hath blessed us on our way,
With countless gifts of love, and still is ours today."
– *Now Thank We All Our God*, M. Rinkart, 1637

So often we find it hard to thank the Lord – even in much less trying times than those of Pastor Rinkart. Evils befall us all, including all the little frustrations of life that make it difficult to be thankful. Yet, thanksgiving is a wonderful and, actually, a spiritually and emotionally powerful attitude, and it can be an especially blessed time of grateful reflection and experience in the Lord! I believe that the Lord has richly blessed America for our Christian heritage. One example of that heritage is that we have uniquely kept a national holiday of Thanksgiving. Christians can be deeply thankful for the truth of God in His Word – for the Savior who offers us eternal life, and for His love and presence even now! We truly have so much to be thankful for!

One day this evil age will expire, and we will see the Second Coming of Jesus Christ in clouds of glory (Daniel 7:13, Mark 13:26, Revelation 1:7). God is **the only infinite thing**. Philosophically, the creation cannot be infinite, nor can anything within it be, because within the four dimensions of our existence – the world of time and space – every effect we can observe and measure has a cause! **There must, therefore, for all that is in time and space, be a First Cause who, by definition, would have to exist outside of time and space!** This is our eternal Creator God, the God of the Bible – "…from everlasting to everlasting, thou art God" (Psalm 90:2).

As Pastor Rinkart said it when he closed out his great thanksgiving hymn, written in the midst of those great trials of that time in Eilenburg, Germany...

"All praise and thanks to God, the Father now be given,
The Son, and Him who reigns, with them in highest heaven;
The one eternal God, Whom earth and heaven adore,
For thus it was, is now, and shall be evermore."
