

## NEW GE SIGNA VOYAGER MRI

### Increased Patient Comfort:

70 cm wide bore eases patient fears and provides exceptional comfort with a 550lb table weight limit. GE's most advanced noise-reducing technology, SilentWorks, reduces sound levels to roughly the same as ambient noise.

### Enhanced Patient Experience:

Patients can select sound and lighting to fit their mood for a personalized experience which includes skylights, murals and integrated music system.

### New GE SIGNA VOYAGER Scanner Now Offered at Cheyenne County Hospital.

Features include:

- A 70 cm wide bore and 50 cm field of view to make scans accessible to more patients who need them
- Strong whole-body gradients that yield scans that are fast, accurate and highly reproducible
- Breathe-free and Motion-free applications eliminate the need for breath-holds and lying still during the exam; both which decrease the patient's stress level. Experience an overall decrease in claustrophobia.

We feel the right MRI system has arrived and is provided in partnership with Shared Medical Services.
