

Tin Factory

PRICE: negotiable

Town: Byala Slatina / industrial zone

Area: The production base is situated on 91000 sq.m.

Technical Characteristics:

The production equipment is in line with the quality characteristics of the machines and the main suppliers of the production equipment are Thermotechn Engineering, Technoinvest Engineering, Beta Fest, Index 6 and others. The enterprise has automation systems such as: automated line for flexible packaging; a system for control and signaling of sterilization regimes; temperature control system for auger heater; automatic dosing system for dosing machines, etc. The company aims to increase energy efficiency by installing solar hot water systems, installing aluminum joinery with thermo bridge, insulation of walls and ceilings, installation of machines with lower energy costs and more. Installation of additional capacities such as: solar water system, diesel aggregate for increasing the production capacity, etc. A canned factory is equipped with a state-of-the-art technology to produce ready meals.

Common feature:

The enterprise is specialized in the production of heat-treated vegetable boxes and ready-made foods with long experience and excellent reputation for quality over 120 years of offered products. The factory is equipped with its own control laboratory with modern equipment and implemented automatic system for planning, management and control of the production process. A canned factory is equipped with a state-of-the-art, ready-to-use dishwashing technology. The enterprise has an optimized file system for receiving orders. Technological lines are 7 in number. The types of packaging are: glass packaging, flexible PP packaging, metal boxes. Strict quality control of raw materials is established by consulting the company's partners in seed selection, vegetable growing, harvesting and transportation. There is also the opportunity to provide a natural humus mass from your own Red Californian worm farm.

Production:

The annual capacity of the factory is 4500 tons. The factory has a built and equipped workshop to produce ready-made meat and vegetable food in trays. With it work in the factory can be all year round. No preservatives, sweeteners, flavor enhancers and color additives are used in the production -

only natural products from guaranteed producers. All products are available in glass jars, rear view caps and sizes 370 ml, 580 ml, 720 ml, 1000 ml, 1700 ml, 2650 ml. We produce the most diverse products such as beans, pickles, lutenitsa, avarage and many more - the portfolio is over 120 products.

Seasonal production: July - November / yearly. Ready-to-ship products from the new harvest: August - September.

Partnerships, clients, products:

80% of the production is exported to the EU, Canada and the United States. Germany's share of the total export volume - 87%; the established products for 20 years on the German market are: avian, pinch, lutenica, roasted pepper, pickled cucumbers, hot and broccoli peppers and ripened beans, turkey and new original products from the groups of avar, lutenica.
