[**Assessment, Collaboration & Outreach - VHA SimLEARN \(va.gov\)**](#)

As a seasoned healthcare professional with 20+ years of experience, Devin possesses a blend of healthcare innovation, construction oversight, and AI-enabled project delivery. His leadership within the Department of Veterans Affairs showcases his commitment to outcomes, safety, and operational excellence.

At SimLEARN, Devin leads a group of education, clinical, and technical professionals that conducts simulation exercises on healthcare environments that prioritizes identifying safety concerns in workflow, patient flow, equipment, and emergency response. He's led the deployment of simulation-based testing and Digital Twin application development to validate layouts, reduce rework, and enhance facility readiness.

Devin has launched enterprise-wide workshops and built cross-functional Communities of Practice with over 650 stakeholders. He's also delivered invited talks at national and international platforms, including the International Meeting on Simulation in Healthcare (IMSH), Healthcare Design Conference + Expo (HCD), and South by Southwest (SXSW), demonstrating thought leadership in simulation integration, facility design, and digital twin innovation.
