

Sepi Browning

A dedicated leader with 30 years of experience leading projects and operations in a healthcare setting, with 16 of those years spent in a hospital information technology department. Leadership has ranged from hospital administration in the Army to hospital leadership in radiology, laboratory, pharmacy, information technology, scheduling and business office operations. Proficient at collaborating with senior leaders on organizational restructuring, governance, and helping navigate and align all facility goals with the needed touchpoint and associated needs with technology for organizational business requirements to be met. Highly knowledgeable of how to lead teams through both operational and project roadmaps, to ensure all dates, budget and needs are met. Life long career has been focused on building strong relationships with all stakeholders, contractors, and vendors to promote an enriching work environment with patient care, safety, and high employee satisfaction as the top priorities.
