ACU Supports Meaningful Reforms to U.S. Sugar Policy

June 15, 2018

Dear Senator,

On behalf of the American Conservative Union (ACU) and our membership around the country, we write in support of **S. 2086 – the Sugar Policy Modernization Act** - which ensures that the sugar program utilizes market forces, reduces taxpayer liability, lifts restrictions on some domestic sugar, and finally allows for basic free market forces like supply and demand to influence how the program is implemented.

The U.S. Sugar Program has gone without reform for eighty years, for longer than any other government subsidized commodity. The program is outdated, and needs change. S. 2086 is the right legislation to implement change.

The bill has bipartisan support in the Senate, and this is a program that conservatives have been working to reform for many years, but have been unable to achieve time and again. Now, with S. 2086, there is a real opportunity to bring free market principles to how the sugar program operates.

Free markets work best when government doesn't distort the playing field, and that is why the U.S. Sugar Program needs to be updated. ACU is proud to give our support to the **Sugar Policy Modernization Act**.

Sincerely,

Dan Schneider
Executive Director
