

# PHP Software Developer

An expanding national software firm with local roots has a professional opportunity for a detail oriented and task driven individual who can provide exceptional Client service experiences and project management. The company focuses on making lives easier through technology and education. Its culture thrives through the success of others, individual's integrity, and an easy-going environment.

Requirements: Strong PHP development skills; Bachelor's degree in Computer Science or related field; Project management experience preferred and Occasional overnight travel to client sites

Attractive salary, retirement plan, health contribution, and flexible time off for family are good reasons to work here, but our people make it great. Growth and advancement opportunities are available for engaged employees.

If you are just as passionate about creating new possibilities through technology, send cover letter & resume to:
