

HowTo Create Covers

Hello and welcome! In this video I am going to demonstrate on how to create your very own cover using Cover Genie Pro. Without further ado, let's get started!

First and foremost, log into your Cover Genie Pro account.

On your dashboard, click on create new project.

And then, you will get to choose whether to start a blank template or design template.

In this case, I am going to choose design template.

As you can see, in this page you get to choose which type of cover that you desired.

You can choose from box covers to realistic mock-ups.

I will go with book cover as a example.

Select your preferred cover type and then click on next step to continue further.

Next, choose your preferred design for your cover.

You can navigate from page to page to check out the design.

Pick the one that suits your product the most and then go to next step.

On this page, enter your project title and you can start editing your cover.

First, click on the text button on the left hand side to edit and insert the text of your choice.

You can type in or omit the original text from the template.

If you are not satisfied with the cover images, you can search for better stock photos to put in.

Go ahead and click on the image button just below the text on your left hand side to do your editing.

A pop-up box will appear on the right side of the page.

This is where you can choose your image option, whether to upload a new file or choose image from your media library.

Next, let's move on to the background colour.

If the original background is not appealing, you can change it to match your preference.

With Cover Genie Pro, you can change the colour and the background to images to suit your choice.

All you need to do is just select, drag and drop.

It is just that simple!

Furthermore, you will notice that there is an elements button down below the background.

You can choose to insert various types of clip arts, from people to web.

Besides that, Cover Genie Pro provides you the opportunity to reach out a wide diversity into your market.

After you have done all your editing, click on the export button to preview your cover.

From here, you can choose to download your cover to your computer in PNG format or just simply click on save & close to go back to your dashboard.

When you have clicked save & close button, your cover will appear on the dashboard together with your project title.

And there you have it, now you can start creating your very own cover with Cover Genie Pro with ease. Thanks for watching.
