IV. Alphabetical List of AggData	58

I. Explanation and Information

Following is the February 2015 issue of the AggData Catalog, a downloadable, printable version of the online directory at www.aggdata.com/data. The data listed throughout this document is presented in several ways. First, lists of data added to our library during the previous month are presented in Section II. These are not necessarily lists that have been collected during the previous month, but rather lists that have been added to AggData.com's online store during the month.

Section III lists all AggData, separated into top level categories. Datasets can be listed in more than one category. Finally, Section IV lists all AggData alphabetically. All tables contain four attributes for a list of data: the name of the list, the number of locations (records) in the list, the date the list was updated last, and the price of the list at aggdata.com.

Please feel free to contact us anytime with questions or requests.
