

MetalMiner™ Forecasting

We

- Technically study price and volume
- Analyze each metal, group of metals and commodities as a whole
- Identify price trends so buyers know when it is time to hedge and when it is not

They

- Focus only on supply and demand fundamentals already discounted in the price, totally useless for timing the market
- Study a metal individually, discounting what the sector and the market are doing
- Guess the future (a fool's game) without a strategy

3M LME Aluminum Price

Let's begin
