

Ahee

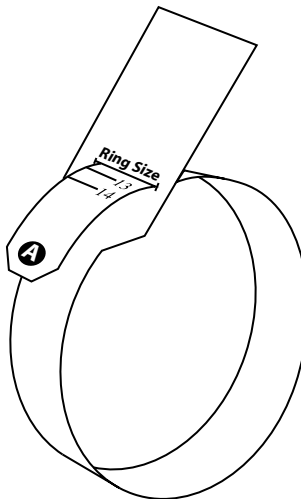

- 1 Make sure your printing setting scale is 100%. Print out this page.
- 2 After printing, use a ruler to ensure accuracy. Measurement should equal 3 inches.

- 3 Following the dotted lines, cut out the ring sizer below. Also, cut a small slit along the dotted lines marked "B".

- 4 Wrap the sizer around the finger you want to measure. The numbers should be facing you. Pull "A" through Slot "B" until the sizer is snug. The number aligned with Slot "B" is your ring size. If slot "B" falls between two numbers, order the size between the two numbers.
