# HOW TO DETACH MAGNIFIER FROM STAND & INSTALL BATTERIES

Remove magnifier lens from its stand by sliding it upwards.

*Make sure you are on a flat and safe surface when handling magnifier with stand.*

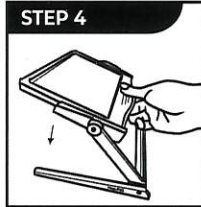

After removing the magnifier from its stand, flip over the magnifier to show case the battery compartment.

*Insert 3 AAA Batteries correctly shown in diagram.*

Once batteries are inserted, you can now put back the magifier on its stand by sliding it back on.

*Make sure the magnifier lenses is cradled into the groves of the stand.*

Ensure the LED lights are pointing down toward the text or item you want to magnify. *If the lights are facing you, turn the magnifier so it's facing away from you and make sure it's properly adjusted on the stand.*

# HOW TO USE HANDS-FREE STAND

Lay the magnifier with stand on a flat surface with the rubber facing the surface. *Note: Once you take out the Magnifier out of the box, lay it flat on a table.*

Turn the arm of the magnifier stand at a 90 degree angle as shown on the illustration.

Flip the screen magnifier upward and angle at a spot that suited to your liking. *Note: Dont be afraid of the clicking. Thats the joints of the stand*

Adjust your magnifier screen to your liking and you are ready to read! *Note: you can move the screen by using the arm of the stand or the screen.*
