Disco Ball Light With Sound Activation

1. The on/off button will be switched while the light is powered by a battery.
2. Make sure the suction cup is firmly connected to the wall before using it if you used it to install it. If it falls, firmly suction cup it back in place.

Product Description

- **LED Disco Ball Portable Tiny Light**

The palm-sized stage light can either be fastened to a wall or roof or placed directly on a table or desk. Outstanding stability. Tiny and beautiful on the outside, light in weight, and portable everywhere.

- **Many Power Supply Options**

The most recent version of the mini micro USB port stage light may be charged directly by a USB cable from any power source, including a computer or power bank. You may use a 3AA battery right away (Not Included). More mobility and flexibility in outdoor exercise are provided by Portable Powered Way. 5V or 12V, 50/60 Hz, 3W rated power. Without having to worry about an over-current or over-voltage issue with a US plug power adapter, USB-powered cables are more reliable. A necessary birthday present for your children.

- **Magic Ball Led Party Light in Multi-Color**

For any type of stage or party lighting, this Amazing Spinning Magic Disco Party Light is a great option. Not only for festival gatherings, but also for bars, coffee shops, shop entrances, and other places, it could produce magnificent and vibrant visual illumination effects and a romantic ambiance.

- **SUCCESS CUP**

Since the party light has a suction cup on the bottom, you can mount it almost anywhere, including on the windscreen, so you can enjoy the party while driving.

- **AA BATTERY OPERATED BY THREE**

In addition to being charged by USB, it can also be powered by three AA batteries, which will make it safer and handier.

• DISTRICT CONTROL

To make it more enjoyable, a remote control makes it simple to select the lighting hue, lighting mode, and sound-activated mode.

Features

- 7 lighting modes, 3 sound-activated modes, and a rotating speed control
- Bright Seven Modes of Disco Lighting The convenient remote makes it simple to select either a disco ball light in solid or rainbow hues. (red, green, blue, red/blue, green/blue, or all of the hues together).
- Ideal party supplies for celebrations such as birthday parties, pool parties, disco parties, dance parties, pajama parties, weddings, Christmas parties, karaoke events, DJ Halloween parties, and stocking stuffer gatherings.
- No Limited Installation Location. These LED stage lights may be mounted on a wall or ceiling with suction cups or placed on your desk.
- **Tips:** The on/off button will be switched while the light is being powered by a battery. A simple and straightforward 30-Day 100% Satisfaction or Money Back Guarantee is provided at a cheap price. Try these party decorations today without any risk. Also, it makes for terrific kid toys for kids between the ages of 5 and 12 who make excellent Christmas presents.

FAQs

What is the difference between GL027-CA and GL027-CE?

The difference between GL027-CA and GL027-CE is that one comes with a remote control, one does not.

What is the difference between GL027-CA and GL029?

The difference between GL029 and GL029 is that one comes with a remote control, one does not.

What is the difference between GI037 and GI037C?

The difference between GI037C and GI037C is that one comes with a remote control, one does not.

How is a disco light effect created?

Contrary to popular belief, creating a disco light may be as simple as installing a light bulb. Take off the cover from a ceiling light, for instance, and swap the standard bulbs for a revolving one. If you want to place a disco light bulb somewhere else, you can easily run lamp cords from power sockets there.

How is a disco ball made to light up?

The first spotlight should be mounted high on the wall and pointed straight at the disco ball. Make the focus just wide enough for the beam to cover the entire disco ball. A hemisphere of light that illuminates half the room should be produced by the spotlight if it is set up correctly.

What is dance lighting for DJs?

Lights DJ. These are lights that come on while people are dancing. They revolve to the music and are colorful to make for an enjoyable experience.

How do DJ lights operate?

To create color and occasionally forms, a halogen bulb shines through a filter gel sheet onto a mirror. A colored mirror is sometimes used in DJ lighting effects in place of color/filter gel.

How many lights is needed for a DJ?

Well, that depends on how big the space is where you're DJing. If someone is standing close to your booth at larger events, their face will be in shadow, so you should have more than 8 lights.

Do DJs need lighting?

DJ lighting plays a significant part in enhancing that experience. Although it isn't as important for a party or event as music is (without music, even the most extravagant lights would merely make your gig appear like a showroom), DJ lighting determines the tone and ambiance of a venue.

What is the name of the disco light?

Disco Light has 1 solution as of now. STROBE is the most likely solution to the clue.

How is a disco ball made to spin?

A spinning motor is all that is required. Many disco ball retailers also stock the appropriate motor to start the disco ball spinning. You'll also need a light source to shine onto the spinning disco ball in order to produce lovely reflections on the floor and walls, which will improve the disco ball's appearance.

How can a disco ball be made to sparkle?

The first spotlight should be mounted high on the wall and pointed straight at the disco ball. Make the focus just wide enough for the beam to cover the entire disco ball.
