## Product Overview

02

## Battery Installation

1. Open the battery cover, install 6\* 1.5V Alkaline batteries into the battery slot, and make sure the battery polarity is installed correctly.

The detailed installation method can follow the battery card.

Tips: The battery specifications should meet the requirements and have sufficient power.

2. Close the battery cover

03

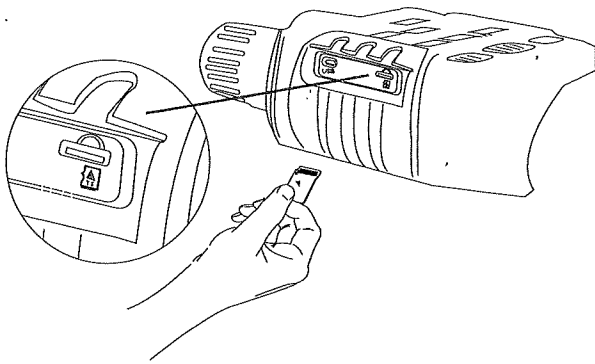

## Inserting Memory Card

1. Insert the Micro Memory card into the slot before use. Make sure the direction is right.

2. Remove the installed memory card, press the edge of the memory card in gently, and it will come out.

Tips: Storage capacity between 4GB and 32GB is recommended.

Note: The device will show "No Card" if the memory card is not installed properly.

## Turn on the device

Power On Press the power button for about 3 seconds to start the night vision device.

04

## Photo Mode

Turn on the device, if not in photo mode, please press [MODE] button to switch to photo mode.

## Video Mode

Taking a video the default is video mode. If not, press the [MODE] button to select video mode.

05

## Focusing the image

On the left lens, marked "far" and "near". If the observation distance is far, please rotate the lens to left. If the distance is near, rotate the lens to right. Users can repeatedly adjust the optimal focal length according to the actual observation distance.

When you track the target is blurry, it means that you need to adjust the objective focusing handwheel, and repeatedly debug until you get a clear image.

## Digital zoom

In the photo/video mode, press and hold the  $\mathcal{R}$  or  $\mathcal{L}$  button for 3 seconds to turn on the zoom, the maximum support 4x zoom

06

Zoom off

Zoom on

## Turn on IR
