- A. Right eye parallax compensation wheel
- B. Focusing Wheel
- C. Right eyepiece
- D. Left eyepiece
- E. Objective Lens
- F. Objective Lens
- G. Rubber Eye cups
- H. Strap hole
- I. Eyepieces Cover

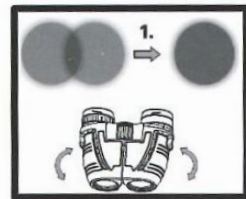

How to use

1. Rotate / Pull down the rubber eye cups:

According to your need: Rotate the rubber eye cups (Not wear glasses), Pull down the rubber eye cups (wears glasses).

2. Folding the both side of the binoculars:

To achieve perfect alignment of the eyes and the eyepiece (C&D) openings, Folding the both side of the binoculars according to your pupil distance until you have a single clear field of view.

3. Adjust the focusing wheel:

Open your eyes and aim at the eyepieces (C) and (D), then cover the right objective lens (E) with your hand and rotate the focusing wheel (B) until the image in your left eye appears sharp.

4. Rotate the Right eye parallax compensation wheel :

Now open your eyes and aim at the eyepieces (C) and (D), then cover the left objective lens (F) with your hand and rotate the right eyepiece (A) until the image is sharp in your right eye.

5. Now you can see any distance objective clearly while you rotate the wheel (B).
