INFOCUS

GENERAL INFORMATION

BADGES

All attendees and exhibitors must keep their conference badge visible at all times. There will be a penalty fee of \$50 for lost badges at this event. Please advise registration if you see someone without a badge.

PENFIELD BUSINESS CENTER

Penfield's location is an authorized shipper for FedEx, UPS and the U.S. Postal Service. They provide domestic and international service in addition to providing all insurance and delivery confirmation options. This self service center is open on the weekend 8am - 6pm and weekdays 7am - 9pm.

PARKING

Valet Parking:

- \$26 for 0-3 hours; \$32 for 3-8 hours; \$39 for 8+ hours.
- Overnight is \$39 per car with in/out privileges.

Self-Parking:

- \$8 per hour with a maximum charge of \$29.
- Overnight is \$29 per car with in/ out privileges.
- \$10 all day Saturdays and Sundays

Oversized vehicles can be accommodated for \$35, but spaces are limited. If the hotel lot is full, hotel attendants can provide guests directions to the nearest available parking.

CONFERENCE EVALUATIONS

An online survey about INFOCUS will be sent immediately following the conference. Please watch your inbox for the survey to help us continue to improve your experience.

LOST AND FOUND

Please give any lost items, other than conference badges, to the hotel front desk. Badges can be turned in at the Quest registration desk.

ACCESSING PRESENTATIONS

A PDF copy of each presentation will be available in the Quest File Library within one week of the event. To access, visit www.questdirect.org and browse the File Library located under the Community Tab at the top of the website. If you experience issues, contact education@questdirect.org.

MAP YOUR SHOW

Use the agenda builder at <http://bit.ly/INCREATEAGENDA>. We will also send out schedule updates and reminders via email during the event.

WIRELESS

Wireless Internet access is complimentary in the hotel's main lobby directly above the Plaza Concourse level. Guests may login to their own computers or they may utilize the Sheraton Link, where there are desktop computer and printer stations available for guest use. Guest room wireless is complimentary with the user name and password QUESTINFOCUS.

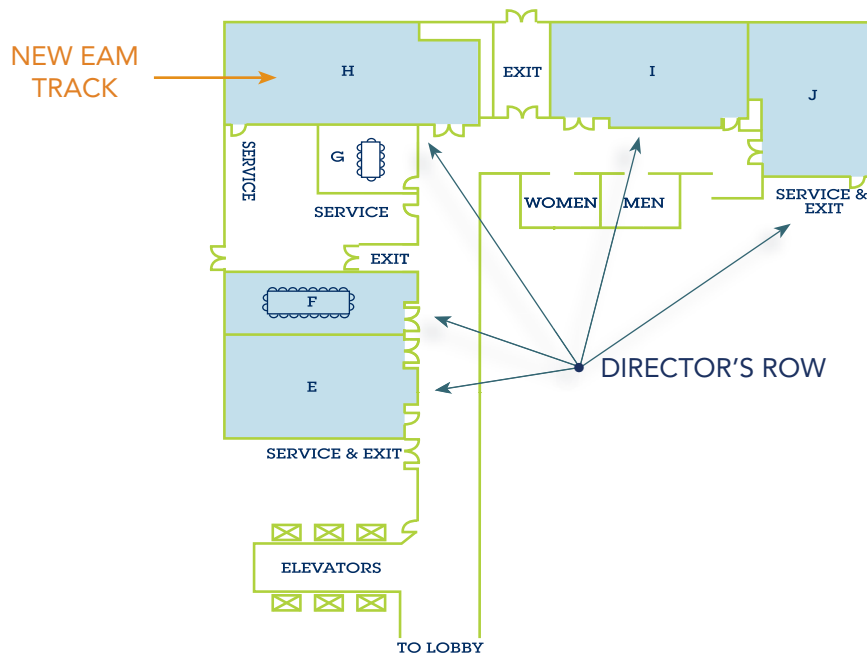

PHOTOGRAPHY AND VIDEOGRAPHY

By attending the INFOCUS, all attendees hereby irrevocably consent to and authorize the use by Quest and its assignees and licensees of any and all photographs and video images taken. This includes any reproduction of the images in any form in any media whatsoever.

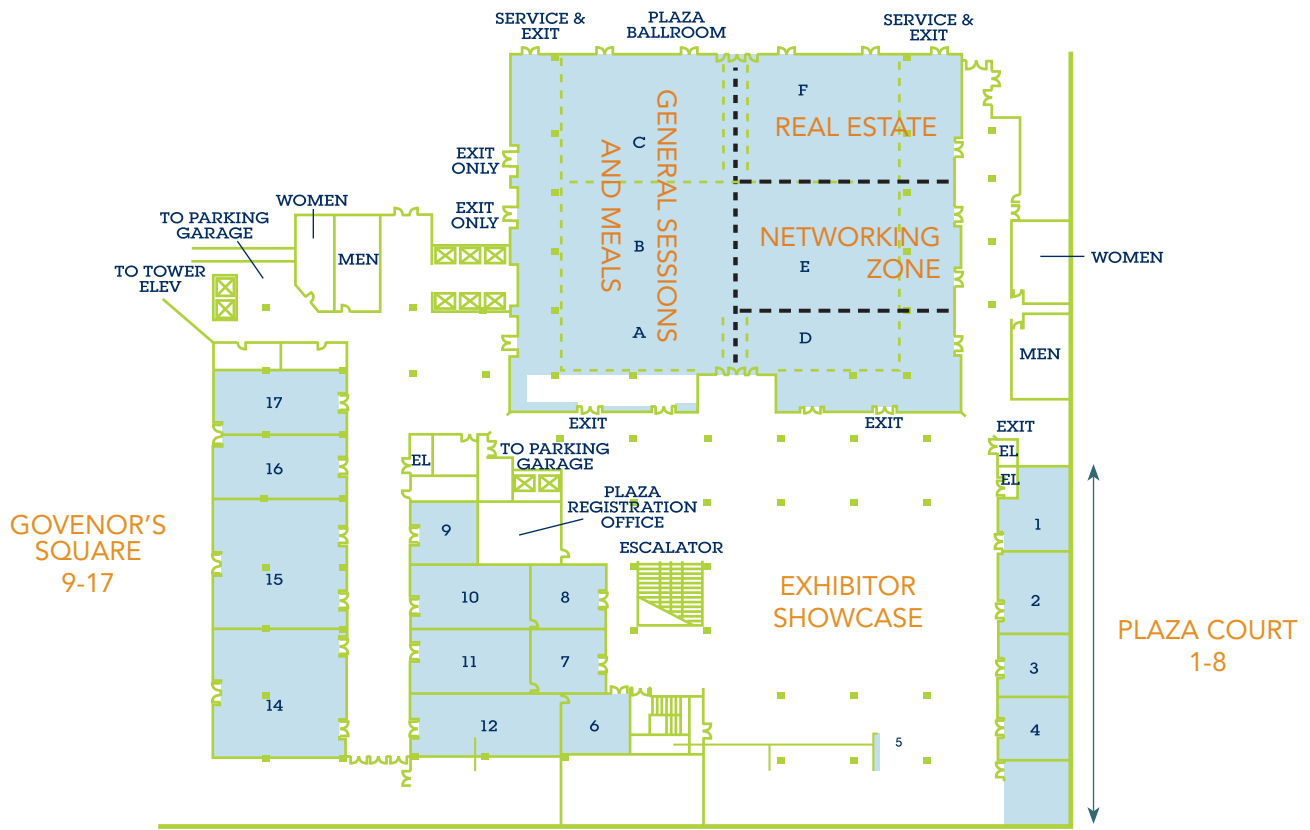

NOTICE ABOUT SPEAKERS

The opinions expressed by speakers at the conference are their own opinions and do not necessarily represent the views or opinions of Quest International Users Group. Quest does not provide technical, software, legal, accounting, tax or other professional services or advice, nor do they endorse or guarantee the accuracy of any opinions or information expressed or provided by speakers at the conference. Presenters retain the right to decline admission to a session which contains information that may be sensitive to a specific audience or competitor.

INFOCUS SUPER SESSION, SIGS & MORE

TUESDAY, DECEMBER 2, 4:10 PM – 5:20 PM

INFOCUS Opening Super Session by Quest & Datalytics Technologies LLC
Mike Helton & Joe Guerra
Plaza Ballroom ABC, Concourse Level

DATALYTICS
TECHNOLOGIES LLC

Quest is teaming up with Datalytics to host this opening super session and together we will tell you everything you need to know to start the conference off right.

TEXT HOLDER - In Joe's role as SVP of Datalytics Technologies RapidDecision, Joe oversees all product architecture and development. Joe is one of a few people in the world deeply understand all facets of BI and have also contributed to the success of thousands of installations. The customer committee is working closely with Joe now to select the best topic. Check the web site for the latest.

TEXT HOLDER

SPECIAL INTEREST GROUP MEETINGS

These sessions will provide instant benefits you won't find anywhere else. You don't have to be a member to attend at the conference, all customers welcome. Meetings will be listed with regular education sessions plus we'll have networking during meals by those same topics.

- Roundtable discussions – participate in an open discussion with JD Edwards strategists plus others who share your job title, who use the same JD Edwards module or are in the same industry about work-arounds, product bugs/ fixes and more.
- Network and share experiences with users like you. Create a network to utilize as resources for future problems and fixes, saving you time and your company money.
- Many JD Edwards strategy and development will attend applicable meetings as available to brainstorm around product enhancement options and ideas to possibly include in upcoming Feature Packs and releases.

GENERAL SESSIONS

WEDNESDAY, DECEMBER 3, 8:30 AM – 9:20 AM

Innovation In Focus: Mobility and JD Edwards
Dawn Baker, Vice President of EnterpriseOne Product Development
Plaza Ballroom ABC, Concourse Level

ORACLE®

Dawn Baker, Vice President of EnterpriseOne Product Development

This session highlights new product value that has been delivered in the latest JD Edwards EnterpriseOne Applications and Tools releases and provides insight to future plans to help you map a meaningful business strategy going forward. Find out where we have recently been and where we are going with the latest JD Edwards roadmap update. In Dawn's role, she is responsible for the application and technical engineering teams developing JD Edwards EnterpriseOne solutions.

Dawn has been with Oracle / JD Edwards since 1995, holding various engineering and management roles in the product development organization. Prior to joining the J.D. Edwards team, she directed development teams and software projects for several distribution, telecommunications, insurance, and manufacturing companies. Dawn holds a masters' degree in Computer Information Science from the University of Denver.

WEDNESDAY, DECEMBER 3, 3:30 PM – 4:20 PM

DSI Keynote – What Is The Mobile Supply Chain?

Gordon Van Huizen, Chief Technology Officer
Plaza Ballroom ABC, Concourse Level

In today's digital economy, more organizations are realizing that optimizing the supply chain isn't just about reducing costs and increasing efficiency. Beyond optimization, supply chains must be fundamentally transformed to support evolving business models, to become more competitive, and to comply with regulatory requirements.

The challenge, however, is that supply chains are becoming more complex, fragmented and dynamic, which makes it more difficult to establish and enable the control and visibility that are essential to optimal operations. The solution: adopting a mobile supply chain, which delivers end-to-end visibility and execution across the extended supply chain by providing mobile workers—regardless of their role or location—with the moment of truth information and control that they need.

Sustainable competitive success now requires that businesses take a bimodal approach not only to their technology, but also the supply chain. Enterprise software performs core processes, maintaining a layer of stability that's essential to efficient operations. Yet companies also need the agility to quickly execute against these processes and add a layer of innovation that enables mobile-optimized responsiveness, which is why a mobile supply chain has become the new business imperative.

During our presentation, "What Is The Mobile Supply Chain?," we'll discuss the supply chain evolution that's transforming a traditionally static, linear supply chain model with the customer at the end to a set of dynamic, omni-channel processes centered on the customer. We'll show you how a mobile supply chain enables and capitalizes on key business moments, resulting in immediate efficiency while also creating the agility to meet current and future business needs. And we'll also introduce you to our mobile supply chain solutions so that you can successfully implement a comprehensive mobile-optimization strategy across your organization's supply chain.

THURSDAY, DECEMBER 4, 11:30 AM – 12:20 PM

Luncheon with Lyle: What's the True Value of your Oracle JD Edwards Maintenance Dollars*

Lyle Ekdahl, JD Edwards Sr. Vice President General Manager
Plaza Ballroom ABC, Concourse Level

You trust your business with your JD Edwards solution. It makes sense to take care of the investment so that your business is not interrupted or harmed by technology or software failures of any type—and that's why you invest in a maintenance support contract. But not all maintenance contracts are created equal. Hear Lyle Ekdahl, JD Edwards Sr. Vice President General Manager, speak about how Oracle customers can get the most from their support investments and where risk and exposure lurk.

**This is a customer-only luncheon. Lunch for vendors will be provided in another area during move out.*

EDUCATION SESSIONS BY TRACK AND TITLE

USING YOUR CONFERENCE GUIDE

Sessions are listed by track and title first to make planning easy for you. Then company name, location and whether the session is for technical users, functional users or both allow you to fine tune your education experience!

Are you a technical user, a functional user, or both? Look for these logos on our session signs to help guide you where you need to be!

12/2/2014 1:00 PM - 1:50 PM

JD Edwards EnterpriseOne HCM SIG Meeting

City of Olathe, Kansas

Location: Governors Square 12, SIG Meeting: Technical/Functional

100200: Attend the annual Human Capital Management SIG meeting at INFOCUS to network, hear enhancement updates, and learn more about SIG events and initiatives.

Human Capital Management

EAM SIG Meeting Part 1

Graymont Services, Ltd.

Location: Governors Square 9, SIG Meeting: Technical/Functional

100760: Onsite meeting with any customers interested in JD Edwards ALM/EAM. Please join us to share best practices regarding this general topic.

Asset Lifecycle Management/Enterprise Asset Management

JDE E1 Tech SIG Meeting

ERP-One Consulting, Inc.

Location: Governors Square 17, SIG Meeting: Technical

101020: This is our semi-annual meeting with the members. We will use this session as a focus group for gathering feedback for Oracle on the new tools and directions.

Technology

Life Sciences IUG Meeting/Outbound Inventory Mgmt

W.L. Gore & Associates, Inc.

Location: Governors Square 16, SIG Meeting: Technical/Functional

103310: Annual on-site meeting for LSIUG. Will discuss Outbound Inventory Management Module Manufacturing and Distribution, Supply Chain

JD Edwards World Upgrade Consortium SIG meetng

Oracle Corp.

Location: Governors Square 11, SIG Meeting: Technical/Functional

103330: On site SIG meeting for anyone interested in JD Edwards World Upgrades Upgrades

12/2/2014 2:00 PM - 2:50 PM

JD Edwards Financials SIG Meeting & A/R Roundtable

W.L. Gore & Associates, Inc.

Location: Governors Square 17, SIG Meeting: Functional

100410: Join the JD Edwards Financials SIG for a short SIG meeting followed by a roundtable taking a deep dive into Accounts Receivable. Learn about some creative things you can do in AR, discuss some creative customizations, and share your own experiences and challenges.

Financial

EDUCATION SESSIONS | TUESDAY

JDE E1 HCM SIG Roundtable - Problem Solvers Discussion

City of Olathe, Kansas

Location: Governors Square 12, Roundtable: Technical/Functional

100960: This is a continuation of the HCM SIG meeting at INFOCUS, and will function like our Open Forum on our SIG calls.

This informal session will allow attendees to ask questions regarding issues, configuration, how-to, updates, etc. of the group.

Attendees will assist each other with ideas and solutions, in a relaxed group atmosphere. Bring your problems, and let your HCM SIG members help you solve them!

Human Capital Management

JDE E1 Tech SIG - CNC Round Table

Jefferson County Government

Location: Governors Square 16, Roundtable: Technical

101210: We will bring you up to speed on the newest admin role tools and then talk about how they could be enhanced.

Technology ,Upgrades

JDE E1 Tech SIG Round Table - Developer

King County Library System

Location: Governors Square 11, Roundtable: Technical

101220: The Quest Technology SIG presents this round table for discussion, sharing of solutions and gathering of enhancement requests. This round table discusses E1 Development and Change Management Tools

Development,Technology

EAM SIG Meeting Part 2

Graymont Services, Ltd.

Location: Governors Square 9, SIG Meeting: Technical/Functional

103860: Onsite meeting with any customers interested in JD Edwards ALM/EAM. Please join us to share best practices regarding this general topic.

Asset Lifecycle Management/Enterprise Asset Management

12/2/2014 3:10 PM - 4:00 PM

JDE E1 Tech SIG Roundtable - Package Builds and Client Installation

Pacific Western

Location: Governors Square 12, Roundtable: Technical

101030: We will talk about the challenges of object promotion and package builds.

Technology

EnterpriseOne Manufacturing and Distribution User Group Meeting

Stanley Engineered Fastening

Location: Governors Square 16, SIG Meeting: Technical/Functional

101160: The EnterpriseOne Manufacturing and Distribution User Group's mid-year meeting at INFOCUS.

Manufacturing and Distribution,Supply Chain

JD Edwards Homebuilders SIG Meeting

M.D.C. Holdings, Inc.

Location: Governors Square 9, SIG Meeting: Technical/Functional

102750: Join the JD Edwards Homebuilders SIG for an onsite SIG meeting. This will be your opportunity to meet some of your professional peers face to face and to get a jump start on the networking process.

Quest International Users Group

Location: Plaza Ballroom ABC, Lecture: Technical/Functional

102800: Welcome to JD Edwards INFOCUS! Quest's Opening Super Session will cover everything you need to know to have a successful conference.

Applicable to All

12/3/2014 8:30 AM - 9:20 AM

Oracle Keynote: Business Innovation In Focus

Oracle Corp.

Location: Plaza Ballroom ABC, Lecture: Technical/Functional

103060: Emerging technologies are likely to change not only how you do business but increase opportunities for the products and services you offer. Discover how Oracle's JD Edwards product vision and strategy are aligned with these business and technology trends, hear how the latest solutions deliver on that vision, and gain insight into future product direction to help you plan your business strategy going forward.

Applicable to All

12/3/2014 9:30 AM - 10:20 AM

Navigating the Credit Card PCI Compliance Minefield

Life Extension Foundation

Location: Governors Square 12, Case Study: Technical/Functional

100140: With the growth of credit card payments and the expanding fraud risk, the Payment Card Industry (PCI) continues to raise the "PCI compliance bar" with new and more demanding requirements. No longer does encrypting card information mean PCI compliance. Now JDE customers accepting credit cards need PA-DSS validated software and have to understand the role of Quality Security Assessors (QSA) in the compliance process. Considerations regarding the storage of card information on the company's server or off-site can have important implications on PCI compliance costs. This session provides a view on PCI compliance from the perspective of the JDE customer, credit card software vendor and QSA.

Financial

Flexible but Simple JDE Integrated World Class Web Shopping Solution

Stoner, Inc.

Location: Governors Square 15, Lecture: Technical/Functional

100350: Web sales are an increasing part of our world. Hear how Stoner, Inc. overhauled their web sites to provide world class web pages for improved customer service and support. The new pages include streamlined ordering and check out options to improve the customer experience and reduce frustration and abandoned orders using web tools that fully integrate to JDE Enterprise one. Stoner is better able to manage and track marketing campaigns using JDE and web analytics with a single data repository. All of this has been accomplished at Stoner with a very small marketing and IT staff.

Manufacturing and Distribution

Public Sector & Clouds: Real World Stories

Denovo, LLC

Location: Governors Square 11, Lecture: Technical/Functional

100560: What are the real benefits of Cloud (specifically as they relate to Oracle's JD Edwards and Public Sector)? Can I even do "Cloud" if I am on World? On i-Series? Is the cloud ready for Public Sector? Will I get the speed and performance I need? What about security? These and many more questions will be answered.

Upgrades

12 JD Edwards INFOCUS 2014 – A JD Edwards Modular Deep-dive Event

EDUCATION SESSIONS | WEDNESDAY

IT Staff are from Mars and Maintenance (CAM) are from Venus

Town of Oakville

Location: Directors Row H, Lecture: Technical/Functional

100730: IT Staff and Capital Asset Management (Maintenance) do think differently. IT Staff and Capital Asset Management (Maintenance) have a different thought process when it comes to solving problems, upgrades etc. They need to think of it like a marriage. IT just doesn't get it. They haven't figured it out on how to keep Capital Asset Management (Maintenance) happy and smiling for an easy life. Today we will talk about two successful relationships: Town of Oakville and Graymont. Discover how their CAM group and IT Staff have built a relationship and work in tandem to the successes in both areas and no party goes home with a headache. The fire is still burning.

Asset Lifecycle Management/Enterprise Asset Management

Data Collection Made Easy

Superior Industries LLC

Location: Plaza Court 2, Case Study: Technical/Functional

100920: Present how we designed a simple data collection interface to gather payroll and work order hour transactions from hourly employees to be processed by JD Edwards Payroll. Any organization that has moderate to many employees punching a time clock each morning, noon and evening can quickly generate many transactions in a day. If these transactions are manually entered into JD Edwards, that can be a daunting task. Also, when there are missed or incorrect punches, the follow up corrections can quickly overwhelm those involved with payroll. This demonstration will show an effective way to marshal all this data and provide a platform to scale out your payroll department to a large number of hourly employees.

Human Capital Management

PowerPivot & PowerView for JDE BI: Free Adhoc & Dashboarding Plugins to Excel

Preferred Strategies, LLC

Location: Plaza Court 1, Lecture: Technical/Functional

101580: If you live in Microsoft Excel and work extensively with pivot tables, attend this session to learn how to leverage Microsoft's FREE PowerPivot software plug-in to MSFT Excel within a JD Edwards environment. Installed in a matter of minutes, PowerPivot delivers the quickest, easiest, and most cost-effective adhoc capabilities for JD Edwards World and EnterpriseOne customers. Learn how to quickly gain immediate value from a PowerPivot implementation with real-time analysis capabilities over all your JD Edwards data. Come see how you can empower your business users to become self-sufficient with JD Edwards adhoc analysis and reporting. Applicable to All

E1 Development Soup to Nuts

Unicode Consulting Services, Inc.

Location: Plaza Court 3, Lecture: Technical

101730: What you should know about E1 development. This presentation is to provide a comprehensive overview of E1 development, development tools, best practice, and what to do to immerse your developers to maximize the values of tools.

Technology

Solution for Multi-Tiered Requisition and PO Approvals

Independent Catalyst

Location: Governors Square 16, Lecture: Functional

102130: Setting up purchasing approvals in an environment where approvals are needed at both the Requisition and Purchase Order steps can be complex. The approval requirements of the business are not always clear and may not always make sense. We will present a solution to solve the configuration headache when a Requisition needs to be approved by any department and a Purchase Order needs to be approved/generated by an independent Purchasing team. This solution is simple to implement and uses all standard functionality.

Manufacturing and Distribution, Supply Chain

EDUCATION SESSIONS | WEDNESDAY

12/3/2014 9:30 AM - 10:20 AM

Leveraging JD Edwards in the Internet of Things

WhiteLight Group, LLC

Location: Plaza Court 6, Lecture: Functional

102350: In the world of the Internet of Things, your machines, people and processes, are all connected and enabling solutions which were previously not possible. The Oracle JD Edwards IoT platform is a complete set of technologies providing a framework that allows for very fast deployment of sensor-to-server connections. In this session, we will present distinct use-cases for this technology leveraging the JD Edwards capital asset, inventory and manufacturing applications.

Manufacturing and Distribution, Supply Chain

Global COA Standardization & Renumbering

Deloitte

Location: Directors Row E, Case Study: Functional

102440: Understand how you can approach a global chart of accounts standardization project across multiple systems to optimize the different COA elements, minimize the number of account balances and provide a framework for future maintenance. This helps reduce the likelihood of system & process divergence across sites and can improve support & maintenance efficiency. The session will include a case study of an integrated global energy company that has been able to update hundreds of millions of records, across multiple global and local systems. We will discuss the practical aspects of renumbering, including the functional & technical considerations, the challenges, the tangible & intangible benefits and the future opportunities

Financial

Integrate Your Engineering Change Process with JD Edwards

QBuild Corporation

Location: Directors Row J, Lecture: Technical/Functional

102560: Engineering Change Notice (ECN) Manager is a web-based tool that allows engineering designers to create and modify engineering change orders (ECOs) and engineering change notices (ECNs) from within their design software of choice, while they are making the changes. It provides immediate access to all related documentation, disposition recommendations, notes, e-mails, and files significant to the ECN all in one place. The multiple approval workflow system has the flexibility to allow both Engineering and non-Engineering personnel to approve ECOs and ECNs before they are released to the shop floor.

Manufacturing and Distribution, Technology

What Really Happens Under the Covers During an Upgrade?

Capsient Corp

Location: Governors Square 14, Lecture: Technical

102630: Have you ever wondered what really happens under the covers during an upgrade? Come to this in depth technical session and find out how the upgrade process really works. Hear about the evolution of the table conversion process and how it works today. Learn about in depth trouble shooting techniques. Find out how you can speed your upgrade up and how the different steps of the upgrade really connect.

Upgrades

JD Edwards Labs: Technology-driven Innovation

Oracle Corp.

Location: Governors Square 10, Lecture: Technical

103050: Are you wondering what JD Edwards development is working on? Put on your safety glasses and step into JD Edwards Labs to experience the product in the making. During your tour you'll get a look at some brand-new features and also a sneak peak at some of the ideas we are experimenting with in the labs. If the tour goes well, you will have a chance to share your feedback on what development is doing.

Technology

EDUCATION SESSIONS | WEDNESDAY

Oracle Sales Cloud: An Introduction for JD Edwards Customers

Oracle Corp.

Location: Plaza Ballroom D, Lecture: Functional

103120: Learn how JD Edwards' customers are leveraging modern selling techniques in the Cloud with social, mobile, and analytics. The path to the Cloud paves the way to retain your JDE investment while leveraging the innovations of the Cloud in a seamless, low risk, flexible way.

Applicable to All

Print Your W2s on Plain Paper

Oracle Corp.

Location: Governors Square 9, Lecture: Functional

103160: One of the lesser-known new features in World HCM is the ability to print W2s and W2Cs on plain paper or in PDF format. We will explore in detail how to set this up, using World HCM and Electronic Document Delivery (EDD) and Business Intelligence Publisher (BI Publisher).

Human Capital Management

Easily Configure Multiple Applications in JDE with Café One

Oracle Corp.

Location: Plaza Ballroom F, Case Study: Technical/Functional

103400: Termed as the "Composite Application Framework for EnterpriseOne," Café One is a powerful feature that links multiple applications such as maps, barcode information, charts, web applications, data tables or other information into one "mash up" screen, based on the particular role in the company. Café One also enables to link together multiple JDE screens. EnterpriseOne gives the ability to combine multiple data, presentation, or functionality from various sources. This approach enables the end user to create a single screen with all the specific functionality required to do their job. Users can dynamically define multiple page layouts and aggregate multiple views into a single view.

Real Estate

Stop Fraud on your JD Edwards System – Manage Segregation of Duties with a Fully Auditable Process

Q Software Global, Ltd.

Location: Plaza Court 5, Vendor Awareness Session: Technical/Functional

103760: Managing Segregation of Duties (SoD) and proving compliance is a very complex and time-consuming process, often involving complicated spreadsheets, manual cross-checking and/or complex reporting. With our new Profile Manager module, EnterpriseOne users now have the ability to check for SoD conflicts BEFORE they assign Roles to Users – empowering them to eliminate (or mitigate) violations at source. The process of authorizing security for users can now be fully controlled and delegated to the business. A workflow system and full auditability means control is tighter, yet huge savings can accrue. So now our Security and Compliance Suite allows you to apply your SoD controls at 3 stages to help you protect your business from fraud and satisfy your auditors:

- 1) Preventive SoD checks when someone assigns a new Role to a User
- 2) Preventive SoD checks before you build live security for a Role
- 3) Detective SoD scanning and reporting to identify violations existing in your live system.

Applicable to All, Technology

JD Edwards: Internet of Things ROI

EmeraldCube Solutions

Location: Plaza Court 4 Vendor Awareness Session: Technical/Functional

JDE 9.1 Warehouse Management Best Practices

Trek Bicycle

Location: Governors Square 17 Roundtable: Functional

104150: Last year Trek completed a large JD Edwards upgrade project, moving from XE to 9.1 globally. Our advanced warehouses were left on XE to mitigate project risk. Now we're in the middle of upgrading our highly modified advanced warehouses to 9.1 and coming across several challenges, and largely focusing on how to reduce modifications while keeping the business processes intact.

Best Practices for More Efficient and Cost-Effective Application Upgrades

IBM

Location: Governors Square 14, Lecture: Technical/Functional

100050: With the recent releases Oracle has made across its application portfolio as well as the end of support for previous versions, chance are that an upgrade project will be a part of your organization's IT strategy in 2014. If you are planning an upgrade of one or more of your Oracle applications, then there are numerous best practices recommended by Oracle to ensure more cost effective and efficient upgrade projects. In this session we will explore these topics and more.

Upgrades

An NPS (Net Promoter Score) Partnership of Success

Carolina Biological Supply Company

Location: Governors Square 15, Case Study: Technical/Functional

100120: With thousands of orders daily from more than 100,000 customers via phone and web sales channels, Carolina faced the challenges of increasing order productivity and improving customer satisfaction independently measured by NPS. To improve NPS, Carolina has consistently adopted new strategies and technologies to enhance customer service with call center applications, credit card processing and E-Commerce. These solutions, powered by JDE E1 and SmarterCommerce, have improved call handling, delivered 24/7 web access for ordering and account access, and streamlined credit card processing. The results have included reduced customer service costs, under 6-month ROI, and major improvements in NPS.

Development Tips and Best Practices for JD Edwards EnterpriseOne

Terillium, Inc.

Location: Directors Row I, Lecture: Technical

100280: EnterpriseOne developers: Don't be afraid to take an ESU or upgrade your system! This presentation will provide attendees with information to boost their development experience. By following some simple guidelines and best practices, EnterpriseOne development can radically enhance your business processes, but it should not limit your ability to stay current with the software. Companies can agree to a "no mod" policy by setting a low threshold of "allowable modifications" and using proper change management procedures. Learn how to take advantage of all that EnterpriseOne development tools have to offer.

Technology

Compensation Workbench – (Almost) Out of the Box

Brasfield & Gorrie LLC

Location: Governors Square 11, Case Study: Functional

100490: This session will start by showing the comp workbench set up in detail and go over process options. We will talk through minimum customizations and demo how the process works and also talk about the automation that compensation workbench provides instead of the organization's prior processes. Will also feature how used to not only raises but annual bonus cycle.

Human Capital Management

JD Edwards Reporting Roundtable

Jefferson County Government

Location: Governors Square 12, Roundtable: Technical/Functional

100510: Open forum discussion about reporting solutions for JD Edwards applications. Discussions will include what solutions attendees currently use, what works particularly well in their current environment, and what difficulties people are currently experiencing with their reporting solutions and possible solutions to these issues. Emphasis will be placed on best practice sharing within the community and honest discussions about their needs.

Supercharge your CNC Skills with Advanced Server Manager Techniques

AMSOIL, Inc.

Location: Plaza Court 2, Lecture: Technical

101620: JD Edwards EnterpriseOne CNC Administration can be a daunting task, but with the Server Manager tool administrators can now easily view and manage multiple servers running different platforms through one simple interface. With the use of advanced techniques such as Server Groups, Instance Compare, Call Object Stats and Monitors, the management of a large number of servers and instances across Production and Testing environments can be greatly simplified. In addition learn how to CTRL-click your way to rapid Tools Release and configuration change deployment. This session will feature a live demonstration of the latest version of Server Manager and highlight many new tips and tricks that can supercharge your Server Manager experience.

Technology

JDE IoT - How Superior Industries Integrated Sensors with JDE

Superior Industries LLC

Location: Directors Row J, Case Study: Technical/Functional

102010: The Internet of Things is here to stay. Come learn how Superior Industries is integrating sensors with JD Edwards E1 to track factory floor and plant machines to:

- Reduce service maintenance costs
- Improve workplace safety
- Reduce liability associated with work accidents
- Improve efficiency and provide insight to plant managers

Supply Chain

Drive Business Value with the Latest E1 Tools Release

Guidewire Systems Integrator

Location: Governors Square 17, Lecture: Technical/Functional

102650: The recent E1 Tools Release delivered a unique combination of capabilities that can be configured to provide an exception-based "command center" dash board to monitor key business processes in a real time. We will highlight how E1 Pages, One View Reporting and Cafe1 provide users with alerts and monitors that allow them to focus on the exceptions in their business.

Technology

Leveraging Operational Intelligence with JD Edwards One View

Oracle Corp.

Location: Plaza Ballroom D, Lecture: Technical/Functional

103010: Users across the organization who have access to real-time visibility into operational information are able to make more informed decisions in their day to day activities leading to an increased cash flow and lower operating costs for their organizations. JD Edwards engineering and Oracle's partner Grant Thornton will use practical examples and real-world experience to illustrate how One View provides users with real-time operational intelligence to enable high-performance.

Innovative Integration and Monitoring for JD Edwards EnterpriseOne

Aellius Professional Research & Consulting

Location: Plaza Court 4, Vendor Awareness Session: Technical/Functional

103390: The first part of this session will highlight Aellius LynX Business Integrator, an Oracle Validated solution that allows for seamless integration of external apps with EnterpriseOne with no Z-files or intermediate steps. The product includes LynX Office, a component that allows you to mass upload data directly from Excel to EnterpriseOne for Address Book, Fixed Assets, Journal Entries and more! This product increases productivity, improves performance, and streamlines business processes, while reducing bandwidth requirements and reliance on IT. The second part of the session will highlight Aellius LynX Monitor, a solution to proactively monitor your EnterpriseOne ecosystem. LynX Monitor is agentless (meaning it does not require something to be installed on the servers it monitors!) and it effectively monitors reports, queues, scheduler server, kernels and the EnterpriseOne web client. Timely alerts are sent to key personnel based your unique requirements and configurable thresholds.

EDUCATION SESSIONS | WEDNESDAY

Improving Manufacturing Visibility with Production Numbers

Oracle Corp.

Location: Governors Square 11, : Functional

103930: Many manufacturers are applying a manufacturing methodology in which orders and inventory associated to a demand order is tracked through a unique Production Number. This enables companies to define, track, and manage customer demand from sales order entry through material management through shop floor activities and final shipment. Production numbers facilitate improved customer satisfaction by providing visibility to the customer's demand throughout the manufacturing process to ensure on-time, high quality delivery of product. This session will cover benefits and capabilities in using Production Numbers.

AEG and Anschutz Score Huge Savings with A/P Automation

The Anschutz Corporation

Location: Governors Square 16, Case Study: Functional

100840: It is possible to go paperless, eliminate late fees and take advantage of early payment discounts. Just ask AEG Worldwide, one of the leading sports and entertainment presenters in the world. The company used to process hundreds of thousands of invoices each year across the U.S. through very a manual and paper-centric process. That is, until AEG executives realized that staff could be more efficient and paperwork could be eliminated by integrating a process and content management solution with JD Edwards EnterpriseOne.

AEG is now able to pay vendors 60 percent faster. Join Angela McLean as she explains how AEG made accounts payable more efficient: A/P staff members gained instant access to invoices from anywhere, accelerated approval cycles, eliminated the paper chase, gained visibility into every stage of the A/P process, and simplified their audit process.

JDE E1 - CNC System Administration & Monitoring Best Practices - 1/2

EmeraldCube Solutions

Location: Plaza Court 3, Lecture: Technical

101970: JDE EnterpriseOne requires on-going monitoring and proactive maintenance to run optimally; however, knowing what needs to be monitored and what results to expect can be a challenging task.

In this two-part presentation, we will cover JD Edwards EnterpriseOne System Administration & Monitoring tips and best practices. In the first part/session we will cover JDE E1 performance topics and database monitoring. The second part/session will cover JDE CNC monitoring, log monitoring, and CNC Best Practices.
Technology

Connect the Dots with Cafe One — Dynamic Content from Multiple Sources

Spray Equipment & Service Center Inc.

Location: Directors Row I, Case Study: Functional

102080: Experience how simple it is to connect the dots with Café One. As part of its recent technology upgrade to 9.1 and tools release 9.1.4.6, Spray Equipment & Service Center implemented Composite Application Framework for EnterpriseOne(Café One). This has enabled authenticated users to create their own dynamic links for relevant content they want, based on what is being entered in their JDE application. Our CSRs can be on a call with a customer, enter the customer in a sales order, and sales history specific to that customer is provided in seconds from BI (OBIEE). Or they key in a part number and the vendor's catalog automatically comes up with price and availability from the vendor's website. Now, instead of looking to build power forms, we create new Café One layouts via web client.

Beyond Business Unit Security for World Reporting

Turner Industries Group

Location: Governors Square 9 Case Study: Technical/Functional

104170: Turner Industries, a privately held company out of Baton Rouge, Louisiana is a single vendor solution in heavy industrial construction and vessel fabrication. Over the past 50 years it grew to over 20,000 active employees. Needless to say, being able to report over employees’ information is essential for an organization of this size. Their World environment uses Business Unit Security to prevent certain users from seeing employees’ salaries. However, using World screens masks the entire record. In search of answers, Turner partnered with ReportsNow to implement Masking Security as part of its future proof reporting strategy. Now users can report over salary employees while masking the pay related fields. If, like Turner, your company is on a path of W to E1 migration, you are looking for ways to secure particular fields in your JDE environments, or you want to learn from Turner’s extensive research of third party reporting solutions, please join us for this informative case study.

Insiders Guide to the Values of Archiving

Essentio Inc

Location: Plaza Court 1, Lecture: Technical

101110: Many organizations implement archiving as a matter of practice to address tactical performance gain in system processing or performance. Necessity often drives our behavior when it comes to archiving and purging data; it tends to be reactive and is usually on the heels of user-perceptible performance degradation. The reality is that data, and specifically "big" data, needs to be managed. Having practices and tools in place to manage this data is among the top three imperatives of IT leaders in many recent reports.

We'll be discussing how a strategic data management approach can drive value for years to come, save money, reduce risk, simplify upgrades, and improve performance.

Understanding System Security Features in JD Edwards

Grant Thornton LLP

Location: Governors Square 17, Lecture: Technical/Functional

101470: How well do you understand security within JD Edwards? There are many options available, but what is the best strategy to maintain? Overarching principles, such as Role vs. User based security, *Public, and version level security need careful consideration prior to implementing a security design. If not clearly defined, the end result is usually difficult to manage and may involve starting over. As well, future maintenance and training of your security design needs to be discussed, in order to make changes easier to accommodate as your business evolves. Join us in this session as we examine and demonstrate the main types of security that are used today. We will also discuss general best practices to get you started down the right path.

Upgrading JD Edwards - When to Upgrade and When to Re-Implement

Grant Thornton LLP

Location: Governors Square 14, Lecture: Technical/Functional

102720: This session will cover the key decision to be made when a company is planning to upgrade their existing JD Edwards environment to a new release - whether to pursue a technical upgrade, a full re-implementation, or a hybrid of these options. A technical upgrade simply takes the existing business processes and applications in use and upgrades them to the new release. A full re-implementation looks at all elements of the current implementation and goes through the full Project Life Cycle, reviewing all processes and modules, to determine where changes are needed to gain efficiencies, resolve issues, replace customizations and implement new modules. A hybrid model upgrades some modules with no changes necessary, re-implements others where there are lingering issues or outdated customizations and identifies new modules that can be leveraged to better handle current processes.

Upgrades

Managing Third Party Brokers with CRM

Washington Real Estate Investment Trust

Location: Plaza Court 7, Case Study: Technical/Functional

103450: Real Estate companies rely on external brokers for leasing commercial space, but need to manage the leasing process on internal systems. How can you create portals for your Brokers to provide timely and complete information about leasing activities? This session will discuss development and implementation of a Salesforce based platform that integrates with JDE EnterpriseOne and feeds a lease generation process. We will also discuss other emerging CRM style solutions that are focused on supporting the commercial real estate industry. Join us for an open discussion about Real Estate CRM. Has anyone else had success with third party broker management? What lessons learned could you share with others?

Risk Mitigation - Tools and Applications Upgrade Strategies

Energy Alloys

Location: Governors Square 16, Case Study: Technical/Functional

103640: Companies postpone upgrades due to risks in business continuity, training, low business priority and adoption. Energy Alloys focused on mitigating those risks using powerful tools for testing and management, presenting case studies for business adoption, future ROI strategies and business value conversations.

Applicable to All

Integration Tools

Regency Centers Corporation

Location: Plaza Ballroom F, Lecture: Technical/Functional

103660: Integrations between systems has become core to the success of many projects. Unless you have been living under a rock for 5 years, this fad called 'The Cloud' has caused our data to be ubiquitous between internal databases and external software as a service. Integrations is key to pulling information together for decision making capabilities. Join us as we discuss the Regency Centers' strategic approach of utilizing an Integration As A Service (IAAS) platform to house our systems to systems communications with pros and cons.

Real Estate

Auto Reconcile Received Not Vouchered

True Clarity LLC

Location: Plaza Court 4, Vendor Awareness Session: Functional

103880: Have you ever spent hours or even days reconciling your Received Not Vouchered GL Account? If so, this session is for you! We found the perfect solution for our client and if you also have a high volume of Purchase Order transactions, this may be exactly what you need! With a few simple customizations you can turn this RNV Reconciling nightmare into a five minute process. Don't miss out!

Come hear how True Clarity can help you!

EDUCATION SESSIONS | WEDNESDAY

12/3/2014 2:00 PM - 2:50 PM

How to Automate the Entire Procure-to-Pay. All 9 Processes.

Canon Information and Imaging Solutions, Inc.

Location: Plaza Court 5, Vendor Awareness Session: Technical/Functional

104010: Though we have grown accustomed to thinking in shorthand, Procure-to-Pay is not quite as simple as “procure” and “pay”.

P2P is actually a collection of as many as nine business processes. How to integrate all this info with ERP and other systems, to not only make P2P more efficient, but also share info with relevant people, to enable faster & more accurate business decisions?

Canon’s Enterprise Imaging Platform (EIP) solution for Procure-to-Pay which has achieved Oracle Validated Integration with JD Edwards EnterpriseOne, can automate the entire process within a single solution, leveraging advanced imaging, intelligent capture, and enterprise application integration capabilities. In this session we will demonstrate how you can:

- Scan & extract info from an invoice
- Automatically “interrogate” data and validate it
- Import data to an ERP system
- Archive invoice images with direct link to invoices inside JD Edwards

Financial

Catchup on the User Interface that Evolves & Personalizes to the Desires of Everyone

Oracle Corp.

Location: Plaza Ballroom D, Lecture: Technical

104060: If there is one thing that is consistent, it is that the EnterpriseOne User Interface will evolve and grow in order to meet the needs of today and tomorrows end users. Come learn about where EnterpriseOne is going with 9.1.5 Alta interface, Simplified UI and FUSE Plus.

Technology

12/3/2014 4:30 PM - 5:20 PM

We Solve “Kooky” or Complex JD Edwards Calculations

QI Systems, Inc.

Location: Plaza Court 5, Case Study: Technical/Functional

100110: Come see how JD Edwards customers are using QI Systems’ Flexible Calculation Module (QIS™ FCM) to solve “kooky” or complex EnterpriseOne calculations. The FCM will truly make JD Edwards configurable and increase the total value of your JD Edwards investment.

Technology

Off the Hook! JD Edwards Mobile Apps in Offline Mode

Magic Software Enterprises, Inc.

Location: Plaza Ballroom D, Lecture: Technical/Functional

100220: Tablet and smartphone apps that connect with JD Edwards World and EnterpriseOne are in increasing demand. But what if your users don’t have a current mobile connection? How do you develop an app that allows you to continue working in offline mode and then manages synchronization when communication is reestablished?

Lessons Learned from Upgrading...Technical Tips & Tricks

ALLO Group of Company

Location: Governors Square 11, Case Study: Technical/Functional

100460: Before the start of our upgrade project we worried about the following issues and limitations: availability of our customizations after the upgrade, lack of opportunity to stop the development process in the old system, how to minimize the budget for hardware, and downtime during the period of switching systems. As a result, the project duration was 94 days, all customizations correctly migrated to the new environment, the budget for new hardware was zero, and downtime was 15 hours.

During the project we created many technical solutions which helped us minimize the risks.

Accounts Payable Roundtable

Douglas County Government

Location: Governors Square 12, Roundtable: Technical/Functional

101010: eVouchering provides Douglas County an automated way of processing Account Payable vouchers using a custom automated approval workflow process, greatly reducing handling errors and redundancy and creating efficiencies. This system was built using the JDE development toolset.

Financial

What is my EnterpriseOne Web Users Real Experience?

ERP Suites

Location: Governors Square 14, Case Study: Technical

101070: See how ERP Suites uses the Oracle Real User Experience (RUEI) product for hosting and consulting engagements to monitor, track and measure EnterpriseOne web transactions, response time and issues. Oracle RUEI is a standalone component that can integrate with Oracle Enterprise Manager.

Technology

Taming Complexity: A Novel CNC Blueprint for JD Edwards EnterpriseOne

G. L. Homes of Florida

Location: Governors Square 17, Case Study: Technical

101640: Inspired by Oracle's Advanced Tuning book, we experimented with an unorthodox design idea. The idea resulted in improvements to scalability, availability and flexibility while improving performance in apps like Job Status Inquiry 10X. Virtualization allows for cost savings and scalability where we break EnterpriseOne down into discrete building blocks that make the system management surprisingly simple and as flexible as the CNC concept itself. Load balancing allows us to service instances or respond to hardware failures such that users continue where they left off with no IT intervention. We can test database, operating system, tools release, or ESU changes safely and easily because of isolated environments. It turned out that designing the architecture in this novel way radically improved performance, allowing us to roll out EnterpriseOne 9.1, upgraded from Xe that was faster in every respect even though our databases grew substantially with the conversion to Unicode.

Technology

JDE Training SIG

Matanuska Telephone Association

Location: Governors Square 16, SIG Meeting: Technical/Functional

102100: The JDE Training SIG provides opportunities for JDE clients to increase their skill level by assessing the current state of available JDE training, providing recommendations for improvement and/or additional training services to both Oracle and the JDE training vendor community, and sharing best practices, available technologies, and success stories with each other. The intent of this session is to provide a forum for in-person networking and discussion for individuals interested in exploring all aspects JD Edwards World and Enterprise One Training.

EDUCATION SESSIONS | THURSDAY

12/4/2014 8:00 AM - 8:50 AM

Archiving and Upgrades - a Success Story from DBG

ARCTOOLS

Location: Governors Square 14, Case Study: Technical/Functional

100090: Oracle recommends purging your data as part of an upgrade.

DBG Canada was in the middle of an upgrade from E1 8.10 to 9.1 when they realized that they were facing an absolute showstopper - the 15 years of data they were carrying would take too long for the data upgrade. Plants would have been shut down for days, resulting in major business disruptions and lost revenues. DBG selected ARCTOOLS as their purge and archive solution. The software was implemented in parallel with the ongoing upgrade project. The archive was successful, and the upgrade was successful and on time. DBG realized many benefits from the archive project beyond just surviving the upgrade. These will be discussed in more detail in the session. Learn from DBG's experience how important archiving can be to the success of an upgrade project - regardless of whether or not you have issues such as theirs.

Upgrades

Using Apparel/Attribute Management in Retail

ALLO Group of Company

Location: Governors Square 15, Case Study: Functional

100180: A retailer's assortment planning has the goal to specify the set of products carried in each store that maximizes sales or gross margin, such as a limited purchasing budget, shelf space for products, and a variety of vendors for each type of product. The assortment a retailer carries has an enormous impact on sales and gross margin; assortment planning has received high priority from retailers. This presentation shows how to use Apparel/Attribute Mgmt for retail to create an assortment matrix for each store format, balance the matrix, take the required number of seats for each price category and distribute goods according to the matrix, providing a balance of store stock. You will also learn how to create pre-configured bundles for customers. An additional benefit is demonstrating universal sale assistant workbench that analyzes customer needs, current stock levels, prices, promotions and customer loyalty program bonuses and recommends a best purchase option and bundle for customer.

Order out of Chaos: JDE and Automic Applications Manager Scheduler

Lafarge, Inc

Location: Governors Square 17, Case Study: Technical/Functional

100300: On any given day, approximately 31,000 UBEs pass through Lafarge North America's JDE ERP. Of these, approximately 7800 are user initiated. That means that 75% of the UBEs being processed are machine initiated with multiple dependencies. Lafarge turned to Automic Application Manager (at the time Appworx) to control the flow of UBEs that were time dependent, dependent on other UBEs and emailing reports to appropriate groups. This is to show the size and intricacy of JDE processes that can be run in an organized manner by the Automic software. It will also show some of the details behind data selection and processing substitution and its practicality. Also, it will show the old JDE way of emailing reports and how that has been simplified by using components of Application Manager. In the end, ease of maintenance.

Technology

Consumerization of IT and 5 Reasons JD Edwards is "Currently Rockin"

Denovo, LLC

Location: Governors Square 10, Lecture: Technical/Functional

100620: As we see the consumerization of IT reaching a critical mass, many are wondering how this will affect our "legacy" ERP systems like JD Edwards. Fortunately, JD Edwards (and the Oracle team) have kept up with the changing times of IT. With the arrival of BYOD, mobile, web applications, cloud and the expectation of seamless integration among multiple devices, JD Edwards has solutions to exceed all these expectations. Come learn how your peers are achieving this and more with JD Edwards.

Technology

"I Can See Clearly Now"- How Cardinal Glass Greatly Increased Supply Chain Visibility for Customers

Cardinal Glass Industries, Inc.

Location: Governors Square 12, Case Study: Technical/Functional

101180: Cardinal Glass is the largest fabricator of sealed insulating glass and low-emissivity coatings used in North America. To support its mission of delivering the highest quality glass products for residential windows, effective collaboration with customers is critical, especially in a complex make-to-order environment. After deploying JDE E1 with Sales Configurator, Cardinal sought to enhance its customer service level with 24/7 web capabilities for customer entry of configured orders and visibility into order status, invoice history and payment history. With its JDE E1 and SmarterCommerce Ecommerce solution, Cardinal is now able to provide comprehensive 24/7 customer self-service through its web portal. The results of the web portal initiative have included a reduction in configured order processing and handling costs, improved order accuracy, increased customer satisfaction and a reduction in call center requests for order status, duplicate invoices or more.

EDUCATION SESSIONS | THURSDAY

12/4/2014 8:00 AM - 8:50 AM

Building E1 CNC Dashboards - OneView Reporting for Proactive and Intelligent E1 System Monitoring

ERP-One Consulting, Inc.

Location: Plaza Court 3, Lecture: Technical/Functional

102040: Making key business decisions has become easier with all the information made available by EnterpriseOne. Your business processes are now more automated and integrated with each other. Your decision makers are thrilled with all the analytical data they now have at their fingertips, but what's in it for you, the CNC Guru? All of this analytical data isn't just for your users and decision makers. You need real-time, critical information just as much as your users! What if you had your own CNC Dashboard where you could see the status of your system in one simple screen? What if you could take that information with you when you leave your desk? Server Manager will give you some of this important information, but there are items that Server Manager does not provide that are important to the health of your system. This presentation is intended to educate CNC's on how to use OneView Reporting to create CNC dashboards that will compliment Server Manager.

Technology

Optimize Your Manufacturing Program with Automated Shop Packet Creation

STR Software

Location: Directors Row H, Case Study: Technical/Functional

102220: Improve manufacturing uptime, accuracy, and regulatory compliance by delivering 100% accurate shop packets to the floor on time, every time. This presentation educates JDE EnterpriseOne Manufacturing users, their supervisors, and the technical resources that support them how automating the process of compiling shop packets for on screen viewing and/or print distribution can positively impact quality of goods produced, regulatory compliance, and line uptime. All while eliminating a manual, time consuming, and mistake prone task from your shop floor resources.

Asset Lifecycle Management/Enterprise Asset Management, Manufacturing and Distribution

Integrate and Synchronize CAD Data with JD Edwards

QBuild Corporation

Location: Directors Row J, Lecture: Technical/Functional

102530: Engineering innovation is the driving force to compete successfully in today's fast-paced global environment. Many companies that implemented JD Edwards recognized engineering departments could be challenged to keep up with the time requirements to input BOM and item master data into two different systems: CAD and JD Edwards. CADLink provides an automated solution to integrate CAD data to JD Edwards without leaving the CAD design suite of their choice. CADLink can integrate with SolidWorks, ePDM, Catia, Inventor, AutoCAD, Creo, SolidEdge, Windchill, Mentor Graphics, Altium, Teamcenter, and more.

CADLink allows engineers to view, modify, update, and create Item Master and BOM data automatically, while synchronizing the data between the two systems. It boosts productivity, BOM data accuracy, and frees up valuable engineering resources.

Manufacturing and Distribution, Technology

Consuming JDE Data Analytics with Google Glass/Wearables

Superior Industries LLC

Location: Plaza Ballroom D, Lecture: Technical/Functional

102600: In many industries it is important to summarize and consume data from JD Edwards quickly to make quick production decisions while on the shop floor. In this session Superior Industries will demo how they are leveraging Business Intelligence data from Emerald Vision on wearable devices such as Google Glass.

Applicable to All, Technology

How to Simplify Your JDE Upgrade Project

Deloitte

Location: Governors Square 11, Lecture: Technical/Functional

102780: Today the ERP system has become the application support for the majority of business processes and the repository for the corporation's most sensitive data. To keep abreast with the latest technologies, tools and to seamlessly integrate with third party tools, organizations need to periodically upgrade their ERP systems to harvest these benefits. This presentation offers tips and techniques to simplify your JD Edwards 9.1 upgrade and reduce any associated downtime. Areas to be addressed include:

Upgrades

JD Edwards Health & Safety Incident Management

Oracle Corp.

Location: Governors Square 16, Lecture: Functional

103030: This relatively new module provides the capability to track and manage all types of incidents and near-misses, as well as analyze critical safety metrics and provide regulatory reporting. Come learn how any employee can record the initial details of an incident, the system can then automatically notify interested parties, you can manage investigation and follow-up tasks, track incident costs and action items and record inspections and potential incidents, such as near misses, and of course report to OSHA and the Bureau of Labor Statistics.

Applicable to All

Rolling Out a New Chart of Accounts

Oracle Corp.

Location: Governors Square 9, Lecture: Functional

103230: Your company is growing rapidly, and your CFO wants to rollout a new chart of accounts. The new chart of accounts will improve reporting, streamline adoption for new acquisitions, and standardize the accounting process across the company. Learn the steps to make this a successful project.

Financial

JDE Mobility for Real Estate

Oracle Corp.

Location: Plaza Ballroom F, Lecture: Technical/Functional

103490: Come see new enhancements to the JDE iPad application, and see some of the recently released mobile applications including Job Cost, Maintenance and Tenant AR Information. Gain a better overall understanding of the JDE mobile strategy and roadmap.

Real Estate

What to do when a property's ownership changes in JDE?

Hines

Location: Plaza Court 7, Lecture: Technical/Functional

103620: In Real Estate buildings may change ownership triggering a company change in JDE. Is there a way to easily transfer all lease related information from one company to another, for example when selling a building but continuing to manage it? So far the answer was No, but now the QIS' lease copy tool allows you to conveniently move all PM related data from one company to another.

Equipment Data Management Panel

City of Olathe, Kansas

Location: Directors Row H, Panel: Functional

100790: Equipment data used to be stored in shop floor manuals, on paper logs, and in checklists on clipboards. In today's world, equipment data is not only stored digitally, but is often used for automation tasks, planning, and reporting. However, your equipment database is only as good and as useful as the data you track and maintain in it. Complete and accurate data can generate a big payoff in terms of future planning, performance measures, and automation. Listen and interact with the panel as Graymont and City of Olathe discuss their best practices, lessons learned, and success stories surrounding equipment data management. Determine what equipment data should be tracked, find it a home in JD Edwards, and create a plan to keep it updated and correct.

Asset Lifecycle Management/Enterprise Asset Management

The Better Way to Data Warehouse

Datalytics Technologies, LLC

Location: Plaza Court 4, Vendor Awareness Session: Technical/Functional

101630: Organizations today are dealing with more and more business data – but it's getting harder and harder to access or make sense of it. This severely hampers their ability to get a complete view of the business and perform meaningful analysis. The traditional approach to data warehouses require long and often risky development projects. Learn about a new approach to data warehousing that lets companies connect critical business information, hidden within disparate systems, to the leading BI tools allowing them to make better, more informed decisions – and ultimately improve their business.

JD Edwards and Legacy Software: The Fast Path to Graphical User Interface

Mueller Co

Location: Governors Square 9, Lecture: Technical

101960: Mueller CO. decided to introduce Graphical User Interface using Legasuite Rocket software.

We managed to deploy all of our JDE and in-house developed software to all of our users concurrently. Our approach was to have the Legasuite Rocket Software build the green screens dynamically. This method worked well as a lot of green screens designs are simple and very familiar to the users, like file maintenance and inquiries. Our goal was to have Legasuite Rocket Software dynamically build 80% of our JDE and in-house Green screens. Another 10% would be slightly improved and the remaining 10% would be heavily modified. This process permitted us to move to a graphical user interface much faster and allowed the glamorization of the 20% of the programs to be done without needing additional IT resources.

Lessons Learned from Upgrading JDE (Xe -> 9.1) : Don't Bite off More Than You Can Chew

Empire Merchants

Location: Governors Square 14, Case Study: Technical/Functional

102070: Find out why we crammed 6 months of implementation into a 13 month project. A system upgrade, like any other project, needs to be planned properly. This includes setting realistic expectations for what is delivered and when it is delivered. "With enough time and money we can deliver anything." We will discuss Empire's approach to our upgrade that allowed us to successfully roll out JDE 9.1 to a \$1B+ wine and spirit distributor, on time and within budget.

This will include:

- How we mapped out the timeline to fit our business environments and resource availability
- Set up the organization structure with heavy user involvement
- Testing
- Training
- Involvement of Senior Executives

The key success factors to Empire's upgrade was the buy in and participation of the business team and setting a realistic scope out of the gate and by and large sticking to it.

Upgrades

Henny Penny: Making it Easy for Our Customers to Configure Complex Items Online

Henny Penny Corporation

Location: Governors Square 15, Case Study: Technical/Functional

102360: Henny Penny was looking for a way to increase wallet share and make it easier for customers to do business with them. They were able to do this with an online web portal. Henny Penny wanted a web portal that gave their customers the option to purchase stock and configured items. They wanted a next generation web portal that provided a modern look and feel with graphics and product information. The web portal has given their customers what they need, and help grow sales of their products. With online order capabilities for configured products it has reduced workload of customer service staff as 60% of orders are online while improving order accuracy. Hear how Henny Penny is using their web portal to distinguish themselves from their competition by creating a superior customer experience and extending their JD Edwards business logic.

Oracle Real-Time Scheduler -- the Resource Optimization Advantage for JD Edwards Customers

Oracle Corp.

Location: Governors Square 11 Lecture: Technical

102860: Today's fast-paced business world requires a new level of customer service. Customers demand quality, immediate and dependable response, speedy resolution and minimum cost. Customer service representatives, dispatchers, and technicians must be in sync. Concurrently, economic pressures are demanding that companies cut budgets to do more with less, become less agile with fulfillment practices and maintain tighter controls over inventories. Organizations that cannot manage these conflicting demands will be replaced by competitors who have implemented tools to meet the challenge. Come hear how the Oracle Real-Time Scheduler allows companies to compete in this environment, provide world-class service, and operate in a real-time setting.

Real estate: Job Cost and Reporting for Development Projects

Highwoods Properties, Inc.

Location: Plaza Court 7, Lecture: Technical/Functional

103520: Developing new product as a means of increasing market share and customer base is a major component of long term strategy for real estate companies. New developments present a unique challenge on many fronts; particularly on the systems used to perform initial analysis and presentation to decision makers, as well as tracking costs during the construction phase, and carrying forward into the operations of the project comparing actual results and rates of return to those originally approved.

Join us for an open discussion about utilizing job cost for development projects and the different options available for tracking development costs as well as operating results from the planning stages through the holding period.

Automate your CNC Package Build and Deployment with AutoDeploy Envoy: Featuring Outrigger

AutoDeploy

Location: Plaza Court 6 Case Study: Technical/Functional

100080: Every Oracle JDEdwards EnterpriseOne environment involves some level of complexity as it relates to the package build and deploy process. The time a business spends with valuable CNC resources focusing on the package process can be anywhere from 60 to 80 percent of resource allocation. Business today requires agility and speed to deliver mission critical changes to your EnterpriseOne production environment. AutoDeploy has solved this issue by creating a NO CLICK, ad hoc process to free up your CNC resources to focus on the most pressing matters of the day. Come listen to Outrigger Hotels discuss how AutoDeploy has increased their development cycles by 5x, increased business visibility into critical path projects, and fully automated the package build and deploy process in JDEdwards EnterpriseOne.

Oracle Financial Close Management: Streamline Your Close Process

Innovus Partners

Location: Directors Row E, Case Study: Technical/Functional

100100: Organizations today face a constant stream of requirements and regulations that add complexity and change to their period-end close processes. Add to that reality a manually-driven approach to 'closing the books' and it is not surprising that organizations are beginning to recognize the value of adopting a tool that can efficiently manage all of their financial close cycles. This presentation will make a case for embracing a unified financial close strategy that incorporates Oracle Hyperion Financial Close Management and integrates with JD Edwards.

Do You Know What Your MRP (Materials) Planner Did Today?

Oracle Corp.

Location: Directors Row J, Lecture: Technical/Functional

100240: This presentation is based on a case study experience in electronics manufacturing in Puerto Rico. It begins with five key questions critical for assessing the effectiveness of material planning operations, and then breaks up the analysis into four specific areas to measure and monitor for improvement. Each area is related to a performance chart that is based upon data available in JD Edwards, and in total covers 22 metrics that, if stored in System55 reporting tables, can be analyzed with One View Reporting. All the questions, analysis areas, and metrics will be reviewed, along with an approach for using One View Reporting.

E1 Upgrade Customization Retrofit Best Practice

Unicode Consulting Services, Inc.

Location: Governors Square 11, Lecture: Technical

101680: Do thousands of custom objects prevent you from starting the Upgrade you have been considering for a long time? When the time comes to consider upgrading, retrofitting custom functionalities plays a critical role since the amount of effort could greatly impact required time and cost. This presentation is to share best practices and uncover the mysteries of customization retrofit. Custom functionality is vital to business. Minimizing the risk of losing custom functionalities and having the know-how can drastically improve the project's chance of staying on-time and under budget. This presentation is an update of the original presentation at Collaborate10 to incorporate 1) New lessons from recent upgrade projects and 2) New technical components that are available in the later tools releases.

Portlets via E1 Pages for ESS replaced our JDE OAS Portal and OAM simplified our user login process

Douglas County Government

Location: Governors Square 17, Case Study: Technical/Functional

102230: Douglas County wanted to maintain the use of portlets in the new 9.1 system for their Employee Self Service applications as they did with the 8.12 system portal server. EnterpriseOne password length was an issue to be addressed in the upgrade as well. This presentation will detail their experience implementing a 9.1 upgrade with less reliance on portal servers and taking advantage of native JD Edwards EnterpriseOne capabilities and E1 pages. Simplifying user access by using OAM to authenticate access to EnterpriseOne has decreased support calls and increased the user experience for the organization.

Why Freight Estimating and Quoting are Critical to Customer Service and Profitability at XSE Group

XSE Group, Inc.

Location: Governors Square 15, Case Study: Technical/Functional

100170: XSE Group is committed to growing a profitable, technologically advanced, customer-driven global sales and distribution company. To support its company mission in a highly competitive, low margin environment, XSE needs to tightly manage all costs and freight represents a critical cost component that needs to be considered on every order to achieve profit margin goals while meeting customer expectations. With its JDE E1 and SmarterCommerce Call Center and Freight Management solutions, XSE is able to estimate, quote and charge all freight and handling costs upfront at order capture and profitably source its products from any of its three regional warehouses. In addition, XSE's system manages customer and customer group freight charge overrides to provide special negotiated freight terms to valued customers. The end result of better upfront freight management is having freight contribute to the company's profitability while responding effectively to customer service needs.

Leveraging Business Services in EnterpriseOne for eCommerce Success

Briteskies, LLC

Location: Governors Square 15, Lecture: Technical/Functional

100830: As the eCommerce market continues to expand, integrating key back office business services with the online channel is critical for organizations looking to operate more efficiently and increase their bottom line. Integrating an eCommerce site with JD Edwards can be an intimidating project without a solid plan. Join Briteskies for an interactive discussion about how to leverage key technical components and functional tools as well as an eCommerce integration methodology that can deliver tremendous business value both to the organization and to the end user. Participants will not only get a chance to review some of the "how-tos" of eCommerce integration, but will also have the opportunity to examine two real world examples of customers who are capitalizing on the functionality of their JDE system to be more successful in the eCommerce arena. Participants will hear about JD Edwards customers leveraging business services on a global scale to sell both B2B and B2C.

Supply Chain, Technology

Purchase Accounting Made Easy

Harlan

Location: Directors Row E, Case Study: Functional

100980: Going to be purchased by a strategic or financial buyer? This case study is an overview of tips and techniques used (TWICE!) to easily create JDE environments for a predecessor, and a successor, corporation without losing any historical details. Additionally, this case study shows ways that JDE Fixed Assets was used to meet purchase accounting requirements for US GAAP, US Tax, and local (European) statutory, all in the same successor environment.

Financial

Keep Cash Flowing- How Flotek Industries Integrated Credit Card Payments with JDE E1 in Just 30 Days

Flotek Industries

Location: Governors Square 12, Case Study: Technical/Functional

101320: Flotek Industries is a diversified global supplier of drilling and production-related products and services to the energy sector. In response to customer requirements and the goal of accelerating cash flow, Flotek needed to expand its customer payment options to include credit card payments in just one month with a limited project budget. This case study recaps how Flotek was able to deploy comprehensive credit card capabilities to address customer needs and PCI compliance requirements without consultants ever setting foot at Flotek, without sacrificing decision-making or user knowledge transfer. Also, the session highlights the importance of pre-project planning and coordination as a critical element in ensuring a successful project and rapid execution. In the end, Flotek was able to deploy credit card payments for sales orders and AR collections with the same ease as on account payments and with users not even aware the solution was not part of JDE E1 base solution.

Financial

So Many Options to Correct Orders in JD Edwards, But Which is Right? It Depends...

Grant Thornton LLP

Location: Directors Row J, Lecture: Technical/Functional

101410: There are many steps involved to process a sales order to completion, such as Order Entry, Ship Confirm, Invoicing, and Sales Update. However, many times during this process, factors change causing us to need to make revisions. Unfortunately, many times we are at a point where we cannot simply resolve the issue. But rather, we must finish processing this sales order, and then begin the process to correct. Now comes the fun part! There are many different ways that corrective sales orders can be configured, it just depends on where the information needs to be corrected (for reporting purposes). Join us as we review the options that are available, and discuss some best practices to guide us through this process.

Manufacturing and Distribution, Supply Chain

The Business Case for Staying Code Current

DWS

Location: Governors Square 11, Lecture: Technical/Functional

102090: This session aims to focus on the benefits of being and staying code current for JD Edward customers.

Being code current is essential and it doesn't have to be difficult or cause disruption to businesses.

Research has shown that businesses lose sight and forget to ask themselves what would happen if the outdated systems were to crash and the financial impact and damage to the reputation this could cause. Therefore, the keys points from this lecture are to make customers and potential customers realize that when it comes to maintaining their EnterpriseOne system at the current code level, customers need to adopt a new way of thinking. It is aimed at getting customers also thinking about allocating an annual Code-Current Budget to help them avoid the downfalls listed above.

Upgrades

Shutdowns and Capital Projects - How JDE CAM Can Help You Manage Your Capital Expenditures

Asset Management Solutions, LLC

Location: Directors Row H, Lecture: Functional

102850: Nearly all organizations have a Capital Expenditure/Authorization For Expenditure (AFE) process to track and manage non-expense projects and expenditures. The integrated nature of JD Edwards CAM and Financials systems provide a great opportunity to track and manage Capital improvement, new construction, Major/Minor Shutdowns and other projects where tracking of expenditures and work classification are important. Learn how to manage Projects with unique project ID's, Budget tracking, and Capitalization into Fixed Asset/Equipment at completion through the use of the JD Edwards CAM and Job Costing modules.

Using predictive analytics and BI to improve supply chain performance

Halo Business Intelligence

Location: Plaza Court 4, Vendor Awareness Session: Technical/Functional

104020: Supply chain managers face extreme challenges with supply and demand planning as market and demand volatility increases. SKU proliferation, globalization, and consumer-oriented marketing all contribute to greater supply chain complexity. Better information is the key to better planning. However, it's often difficult to get access to the right data and even harder to analyze that data. This session will showcase an approach to demand planning for mid-market companies that draws upon both predictive analytics and business intelligence capabilities. This approach simplifies data integration and analysis - and describes a workflow to ensure user adoption and better financial performance.

Manufacturing and Distribution, Supply Chain

JD Edwards Tools Roadmap Update

Oracle Corp.

Location: Governors Square 17, Lecture: Technical

104030: The world's best-run IT organizations use technology as a tool to meet real-world business challenges. It is critical that your IT organization fully understand the technology solutions available, how to select the ones that will maximize your IT investment, and how to deliver these to your business users. This session continues the discussion of Oracle's JD Edwards roadmap, with a focus on these technologies. It highlights new technology features that will improve and transform your business processes and also previews the new and exciting technology capabilities on the horizon.

Technology

This isn't your Mammias Package Build Anymore

Oracle Corp.

Location: Plaza Court 3, Lecture: Technical

104040: In the 9.1.5 Tools Release, the package build process will shift from running primarily on the deployment server or admin client, to the enterprise server. Absorb the under the covers process flow information, troubleshooting techniques and to-date known issues in this session.

Technology

Extend and Mobilize your E1 TODAY

Oracle Corp.

Location: Governors Square 10, Lecture: Technical

104070: We've gone to the moon, now it is time to commercialize it. In winning the ERP mobile marketplace with over 85 mobile applications, JD Edwards has revolutionized rapid production of mobile ERP applications. Immerse yourself in learning how to extend and leverage the E1 mobile applications and architecture for customized deployment.

Understanding the Maintenance Supply Chain - The Intricate Relation of Maintenance and Storerooms

Clearwater Paper

Location: Directors Row H, Case Study: Functional

102830: In Asset Intensive industries, the annual cost of Maintenance, Repair, and Operations (MRO) is often second only to Payroll, with a considerable portion of this related to the Procurement and management of MRO materials. The timing and availability of these materials can impact production output, equipment life, and the quarterly/annual financial expenses of MRO. Listen as Clearwater Paper discusses their process re-design and JD Edwards re-implementation of CAM, Procurement and Inventory to better align the customer (Maintenance) with the fulfillment (Procurement and Storerooms) and the impact these process are having on both Operations and the JDE Users.

Asset Lifecycle Management/Enterprise Asset Management

Advise Us - Customer Feedback Programs at Oracle

Oracle Corp.

Location: Plaza Ballroom D, Lecture: Technical/Functional

102880: Want to be more involved with the product direction and strategies for Oracle? This is a value add session! Todd Skoda, Director of Feedback and Reporting will brief attendees on the various methods Oracle uses to gather feedback on its products and services. Todd will discuss some high level results and the latest trends. Attendees will be provided with methods to have your feedback and the feedback of your peers heard throughout Oracle.

North American Construction Group Empowers its Employees

K-Rise Systems, Inc.

Location: Plaza Court 2, Lecture: Technical/Functional

101280: Training each employee to use JD Edwards is not always efficient in a fast-paced, growing company. How can you best give access to their payroll information, securely? Witness an in-depth walkthrough of NACG's employee portal, an implementation of K-Rise Systems' Employee Self-Service Portal. Those standard features you expect will be shown and some unique changes for NACG will also be demonstrated.

Human Capital Management

How to Parse Complex Excel Data Form into JDE

Delta Faucet Company

Location: Governors Square 17, Lecture: Technical/Functional

101650: This project is for automating large parts of our existing business process where some data entry forms are collected and prepared by the end-user. Most of this work is done "off-line" with Excel workbooks that are later re-entered into E1 manually. The Project is to upload the completed forms into JDE and then automatically parse complex Excel Data Form and process the data into JDE multiple tables.

Technology

Integration Strategies for Successful Mobile Applications

DSI

Location: Directors Row J, Lecture: Technical/Functional

101660: The mobile user experience demands that applications provide simpler, more efficient user interfaces. In addition, intermittent connectivity means that applications and business processes must be designed to support users that are not always connected. In this session we explore how integration must adapt to support the new requirements imposed by mobility.

12/4/2014 3:40 PM - 4:30 PM

Faribault Foods Breaks IT Dependency for Reporting and Analytics

Faribault Foods, Inc.

Location: Governors Square 12, Case Study: Functional

102410: Faribault Foods, a long time JDE customer, has broken the usual dependency on IT for their reporting and analytics from JDE. They have shrunk the month end cycle time, have their business users self serving their needs for reports and ad hoc information, and are able to respond in a timely manner to business requests. Having recently been acquired, they were also able to rapidly deal with requests for reports and special analyses from their new owner without infringing on IT (who had other things to do!). They are able to distribute reports quickly, drill down directly in Excel to appropriate details (multiple times a day), and do the analysis they need to do to run the business. A complement to their existing BI solution allows them to stand on their own.

Financial

Inventory and Advance Warehouse - Getting the Most out of Your Applications

Oracle Corp.

Location: Governors Square 9, Lecture: Functional

103220: Your company is changing and evolving so make sure your Inventory and Warehouse are keeping up. Learn what functionality your company should be leveraging to receive maximum benefits - streamline costs, improve reporting, security, and integrations.

Manufacturing and Distribution

The Versatility of JDE – Fleets, CAM, Finance, Transportation

City of London

Location: Directors Row H, Case Study: Technical/Functional

103350: What started as a Y2K Corporate software conversion project in 1999, 14 years later sees eight unique City of London Business units cohabitating freely within JD Edwards EnterpriseOne EAM. Each group manages their assets varying from for cost of services, Preventative Maintenance to Tangible Capital Assets reporting requirements

Asset Lifecycle Management/Enterprise Asset Management

Expense Participation Reporting

Equity One

Location: Plaza Court 7, Lecture: Technical/Functional

Parts, Supplies, and Stuff...Find and Procure the Material That Keeps Your Business Running

Asset Management Solutions, LLC

Location: Plaza Court 4 Vendor Awareness Session: Functional

104160: Have your users been frustrated searching for a part in JDE Inventory? Do you have 50,000+ part numbers and users continue to add duplicates because they simply can't find the ones that are already there? Do your Cost Center's have a disconnect with your employees responsibilities that manifests itself every time an order goes down the wrong Approval Route? Do your Buyers have to immediately fax Backup information (Drawings, Specifications, etc) to your vendors to support the PO's you just sent to them because your PO's only contain the JDE Order Details? Of course you have, but you don't have to anymore.

Asset Management Solutions specializes in helping JD Edwards customers utilizing Maintenance and MRO Inventory/Procurement in EnterpriseOne software. See tools in this functional demonstration that forever change the usability and functionality of JD Edwards. Our solutions improve productivity, reduce frustration, and streamline your maintenance and procurement efforts.
