## **BIG ASS FANS INTRODUCES DOUBLE LED BAY LIGHT**

**LEXINGTON, KY** - (May 14, 2019) - Big Ass Fans has unveiled its latest LED product family release, Double LED Bay Light.

Double LED Bay Light is the most advanced high-bay light in the world. Engineered and built to be the pinnacle in long-lasting efficiency, Double LED Bay Light's thermodynamic design dissipates heat quickly and keeps light shining bright, worry-free for years, thanks to a 10-year, full-fixture warranty.

With three mounting options (aircraft cable, pendant, and flush), rotatable modules providing various angles of light distribution (including full 180° rotation for 100 percent uplighting), and five interchangeable lens options to shape and direct light where it needs to go, Double LED Bay Light is simple to install, adjust, and optimize.

With a max temperature rating of 149 °F (65 °C) and superior light output for over 150,000 hours (17 years of 24/7 operation), Double LED Bay Light can hang from the highest ceiling without flickering, breaking, or overheating.

### **About Big Ass Fans:**

Starting in 1999, Big Ass Fans pioneered the high-volume, low-speed (HVLS) fan industry by introducing large industrial fans to agricultural spaces. Recognizing the fans' versatility, our customers began to install them in warehouses, factories, commercial spaces, and homes. With each new application, our engineers set out to design the perfect solution to meet our customers' needs. Our dedication to innovation has led us to develop the industry's first silent motor technology, smart fan controls and automation, and the world's brightest and most efficient LED products.
