## Landing Mat

### Specification Sheet

### Specifications

The foam core consists of a high density of 45 lbs compression polyurethane foam. The foam provides excellent cushioning used for martial arts, wrestling, aerial arts, gymnastics, cheerleading and rock climbing walls.

18 oz reinforced vinyl cover on the top and bottom is easily cleaned, is resistant to mildew, mold and free of lead and phthalates. The mesh side panels allow air to escape for a softer landing.

All material used is CPSIA compliant.
