AIREDALE TERRIER CLUB OF AMERICA

NEW STANDARD OF PERFECTION FOR AIREDALE TERRIERS

(Adopted by the Airedale Terrier Club of America at its meeting on May 30, 1941, approved by the Board of Directors of The American Kennel Club, August 12, 1941, and accepted as of this date.)

HEAD Should be well balanced with little apparent difference between the length of skull and foreface.

Skull should be long and flat, not too broad between the ears and narrowing very slightly to the eyes. Scalp should be free from wrinkles, stop hardly visible and cheeks level and free from fullness.

Ears should be V-shaped with carriage rather to the side of the head, not pointing to the eyes, small but not out of proportion to the size of the dog. The top line of the folded ear should be above the level of the skull.

Foreface should be deep, powerful, strong and muscular. Should be well filled up before the eyes.

Eyes should be dark, small, not prominent, full of terrier expression, keenness and intelligence.

Lips should be tight.

Nose should be black and not too small.

Teeth should be strong and white, free from discoloration or defect. Bite either level or vise-like. An overlapping or scissor bite is permissible without preference.

NECK. Should be of moderate length and thickness gradually widening towards the shoulders. Skin tight, not loose.

SHOULDERS AND CHEST. Shoulders long and sloping well into the back. Shoulder-blades flat. From the front, chest deep but not broad. The depth of the chest should be approximately on a level with the elbows.

BODY. Back should be short, strong and level. Ribs well sprung. Loins muscular and of good width. There should be but little space between the last rib and the hip-joint.

HINDQUARTERS. Should be strong and muscular with no droop.

TAIL. The root of the tail should be set well up on the back. It should be carried gaily but not curled over the back. It should be of good strength and substance and of fair length.

LEGS. **Forelegs** should be perfectly straight, with plenty of muscle and bone.

Elbows should be perpendicular to the body, working free of sides.

Thighs should be long and powerful with muscular second thigh stifles well bent, not turned either in or out, hocks well let down parallel with each other when viewed from behind.

Feet should be small, round and compact with a good depth of pad, well cushioned, the toes moderately arched, not turned either in or out.

AIREDALE TERRIER CLUB OF AMERICA

COAT. Should be hard, dense and wiry, lying straight and close, covering the dog well over the body and legs. Some of the hardest are crinkling or just slightly waved. At the base of the hard very stiff hair should be a shorter growth of softer hair termed the undercoat.

COLOR. The head and ears should be tan, the ears being of a darker shade than the rest. Dark markings on either side of the skull are permissible. The legs up to the thighs and elbows and the under-part of the body and chest are also tan and the tan frequently runs into the shoulder. The sides and upper parts of the body should be black or dark grizzle. A red mixture is often found in the black and is not to be considered objectionable. A small white blaze on the chest is a characteristic of certain strains of the breed

SIZE. Dogs should measure approximately 23 inches in height at the shoulder; Bitches slightly less. Both sexes should be sturdy, well muscled and boned.

MOVEMENT. Movement or action is the crucial test of conformation. Movement should be free. As seen from the front the forelegs should swing perpendicular from the body free from the sides, the feet the same distance apart as the elbows. As seen from the rear the hind legs should be parallel with each other, neither too close nor too far apart, but so placed as to give a strong well balanced stance and movement. The toes should not be turned either in or out.

Yellow eyes, hound ears, white feet, soft coat, being much over or under the size limit, being under-shot or over-shot, having poor movement, are faults which should be severely penalized.

The use of any and all foreign agents for the improvement of dogs in the Show Ring, such as coloring, dilating the pupil and stiffening the coat, is forbidden under American Kennel Club rules. Such acts are unsportsmanlike and unfair to those exhibitors who live up to the rules.

BEDLINGTON TERRIER CLUB OF AMERICA

THE BEDLINGTON TERRIER

THIS gamest of all terriers has been known as a distinct and thoroughly British breed for over a century, which is, it will be admitted, a fairly ancient lineage. There are various theories about its original ancestry, but the one which holds that it was a result of a cross between the Otterhound and the Dandie Dinmont suggests itself as the most probable. His characteristics strongly resemble those of these two breeds and there can be little doubt of his near relationship sometime or other to the Dandie.

The earliest authentic record we have of the Bedlington is a dog named Old Flint, belonging to Mr. Trevelyan, the Squire of the village of Nether-witton. The pedigree of Mrs. William Clark's Scamp, a dog well known about 1792, is traced back to Old Flint, and the descendants of Scamp were traced in direct line from 1792 to 1875.

Joseph Ainsley, a mason by trade, has the credit for giving the name Bedlington to this terrier in 1825; so-called after the town of Bedlington. They were previously known as the Rothbury Terrier, or the Northern Counties Fox Terrier. The most distinctive feature of the Bedlington throughout his entire history has been his amazing speed, coupled with his hunting instincts. He has staying power, is nimble, quick-witted and intelligent, and his loyalty and affection go without question.

The Bedlington Terrier holds rather a unique place in the terrier group. He is unlike his brother terriers, especially the larger ones, in many respects. Probably, the only thing he has in common is the body, which should be muscular and deep in brisket and give the appearance of depth rather than roundness. There it would seem the similarity of conformation ends. He differs from all other terrier breeds in that he must be flat of ribs and not rounded or barrel shaped.

The front legs should have none of the gun barrel appearance common to most terriers, nor should the breed be up on its toes, the slight bend in the pasterns being natural in this breed. He should not be down on his fetlock, but a noticeable bend should be apparent.

Likewise, the foot should be rather narrow and long, not round and cat-like; the hind legs should give the appearance of being longer than the front, which has a tendency to give a beautiful arch to the back. This arch should not start at the withers, but in the middle of the back. A level backed Bedlington is practically unknown and is certainly not to be desired. There is probably no other terrier that can compete with the Bedlington for speed and he should, therefore, be built on racy lines.

The Bedlington Terrier is unique in that it never sheds, an ideal condition in a household pet and a quality not shared by other terrier breeds.

Down through the ages the Bedlington seems to be one of the very few breeds that has retained his original conformation. From the time the miners in the north of England began breeding this type of dog for a set purpose, there has been no shortening of legs or backs, no cropping of ears or tails, but rather the Bedlington has been kept to those racy lines so typical of the breed.

The terrier's natural instinct is to hunt small game such as badgers, rabbits, fox, etc. The Bedlington is a great hunter and can be trained to point and retrieve, a frequent practice in his Northumberland habitat. It is a natural proclivity when in full coat to retrieve wounded or dead birds in the most icy waters.

Puppy Sweepstakes

Competition will be open to all Bull Terrier Puppies that are entered in the Regular Class; both sexes to be shown together.

Separate Sweepstake Classes will be held for Each Variety.

The Sweepstakes may be entered by sending fee of \$5 to O. W. Ford, 7 Ford's Lane, Old Greenwich, Conn., for each puppy entered with the puppy's name. The total fees of each variety will be divided into four prizes on a percentage basis as follows: First Prize, 40%; Second Prize, 30%; Third Prize, 20%; Fourth Prize, 10%.

No additional fee will be charged for entry but it is important to indicate under "Additional Classes" on the entry blank that the puppy is entered in the Sweepstakes.

Conditions of Parent-Offspring Classes

Competition will be open to all Bull Terrier Sires or Dams to be shown with an Offspring of the SAME VARIETY of either sex and any age. To be judged on type and conformation as a pair.

Separate Classes will be held for Each Variety.

No entry fee is required for this class provided the parent and offspring are entered in a Regular Class; otherwise the Regular Fee will be charged. It must be indicated on the entry blank whether the entry is the parent or offspring.

As the judge's decision in this class will be based on the merits of more than one dog or bitch, no one of the dogs or bitches making up the entry judged first in the class will be eligible to compete for Best of Variety by virtue of having won this class.

COOLYN HILL KENNELS

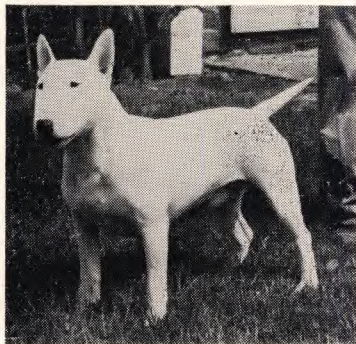

Leaders in Bull Terriers for 20 Years

"WONDER"

Our recent famous champions, Coolyn Wonder, son of Whirlwind, and Coolyn Buckskin won Best of Breed 117 times. Neither of these dogs ever went on a "circuit," and their wins were made with all the competition there was. Wonder won Westminster, The Specialty, Morris & Essex. Buckskin won all 3 in 1 year. Wonder was shown 51 times and won 47, with 5 group wins. Buckskin, in 3½ years, shown 79 times, won 71 of them. This gives Buckskin the Top Record for all time for any Bullterrier, dog or bitch, in relation to the number of times shown, and the small number of times—only 4—when there was no competition. This is interesting to note, since an owner can count any number of Best of Breed ribbons, won at entirely uncontested shows, and so pile up a fictitious record of Best of Breed 'wins' for his dog. Of the 71,

Buckskin placed 47 times in the group, another record for the breed. Six times he won the Terrier Group. At Morris & Essex 1950 he was second, and BEST AMERICAN-BRED TERRIER in the Show. He won Westminster 3 years, won the Isis Vabo Trophy 3 years. One year, shown 22 times he won 21. Another, shown 25 times, he was UNDEFEATED THROUGHOUT THE YEAR.

"BUCKY"

**TAVERNER
"Porge"**

Ch. Taverner of Tartary, our latest winner, won the California Specialty, and the GSBTC Challenge Cup for 1952, the Specialty, N. Y. Feb. '53, the Specialty, Rye, Oct. '53. Also Morris & Essex, the Emmons Bowl, and the Ormandy Jug for 1953. Has won 3 Terrier Groups and 6 Seconds.
