

Ultrasound Gel

McKesson ultrasound gel is an aqueous solution available in high viscosity clear or medium viscosity pink. It is acoustically correct for a broad range of frequencies and can be used for most ultrasonic procedures. Its no-slip formula eliminates air between the transducer and skin. The exceptional coupling efficiency enables more effective treatment and diagnosis. The non-irritating formula won't sting or chafe the patient. This formaldehyde-free product will not damage ultrasound equipment.

Features and Benefits

- Conductive feature for increased image clarity for use in ultrasound transmission
- Non-corrosive for extended instrument life
- Water-soluble for quick, easy clean-up
- High viscosity clear product is great for laser-related applications and prolonged therapeutic applications
- Medium viscosity pink product is non-staining
- Available in high viscosity clear or medium viscosity pink
- Not made with natural rubber latex
