

The Simple, Affordable Upgrade From Key-Locked Cabinets

- Specifically designed and priced for:

Urgent Care/ED	Addiction Treatment	Long-Term Care
Physician's Office	Aesthetics	Hospice
Behavioral Health	CHCs	ASCs

- No service agreements or contracts.**
With ongoing updates and new features through cloud-based software
- Electronically track your medications,** seeing who accesses each med and which patient receives the med
- View real-time inventory levels** of your medications from any web browser

Eliminate Paperwork for your Controlled Substances:

Our **electronic reports** replace paper logs with DEA-compliant digital records. Meet all necessary regulations for audits related to controlled substances and see what's happening with drug inventory in your facility.

Controlled Substance Logs:

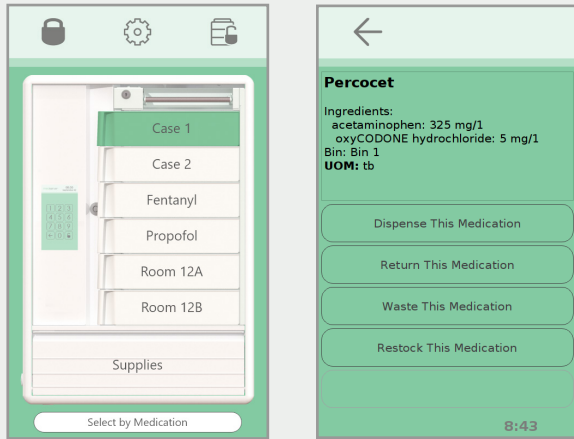

CAREDirect Reconciliation Report

2/7/2020 11:31 AM	Countback	17.00	tb	17.00		Ben Jackson	

Digitally Secure Your Inventory:

Our system requires users to specify what they're going to do with a particular med before it can be accessed. Are they giving it to a specific patient, returning excess meds, wasting, or restocking? The cabinet's software records all of these transactions.

How Much Storage Capacity does your Drug Inventory Require?

- Our expansion cabinets provide digital tracking for overstock & boxed medications
- Cost-effective pricing is specifically designed so that a larger facility can comfortably place multiple cabinets within its walls
- Multiple units can help distribute meds across a facility so that they're exactly where you need them:
 - **Nurses station**
 - **Hallways**
 - **Med/supply room**
 - **Inside the OR itself**
