

ZonGoldbox Wizard WordPress Plugin

Plugin Introduction

ZonGoldbox Wizard allows you to display the latest Amazon Goldbox deals on your WordPress selfhost site. You can display these Goldbox deals on your posts/pages or display it on your sidebar or footer as a widget.

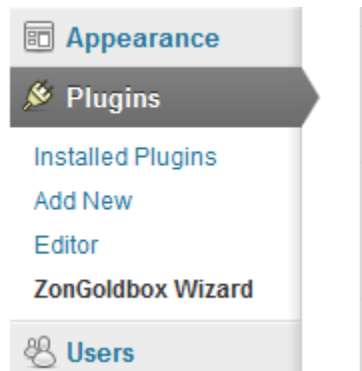

Installing The Plugin

- 1.) From your Admin Dashboard, go to Plugins -> Add New
- 2.) Click Upload, then locate the zongbwizard.zip file on your computer
- 3.) Click Install and activate the plugin

Using The Plugin

After you activate the plugin, first please configure some setting first.
The ZonGoldbox Wizard settings page is located just under the Plugins menu :

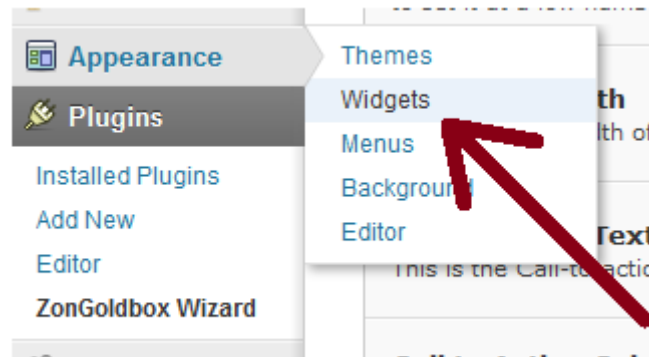

You will arrive at the settings page, it will look like this:

ZonGoldbox Wizard Plugin Setting	
Amazon Tracking ID Insert your Amazon tracking ID (something like amazon-20)	<input type="text" value="amazon-20"/>
Deals To Be Displayed Select according to your need. It is recommended to set it at a low number so the newest one will be on top.	<input type="text" value="3"/> ▼
Enter Box Width Customize the width of the Deal Box inside Posts/Pages.	<input type="text" value="450px"/>
Call to Action Text This is the Call-to-action text that will entice visitors to claim the Goldbox deal.	<input type="text" value="CLAIM DEAL"/>
Call to Action Color Schemes Select according to your need. This is the background color of the Call-to-action button.	<input type="text" value="Green Button"/> ▼
<input type="button" value="Save changes"/>	

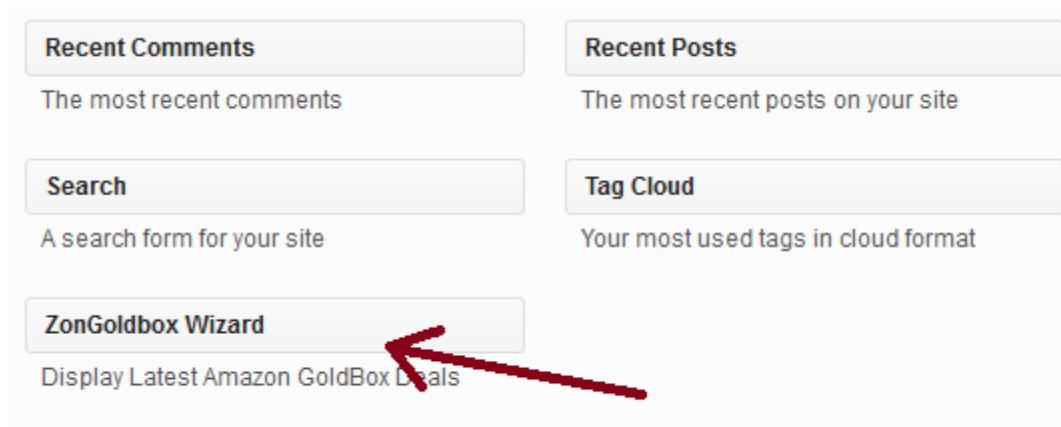

Adjust the option setting according to your need. 😊

After that, if you want to display Amazon Goldbox Deals on your Post or Page, just place this shortcode on the post editor: [zongbw]

If you want to display it as a widget on your Sidebar or Footer, go to Appearance -> Widgets

After that drag and drop the AzonGoldbox Wizard widget anywhere you like.

Troubleshooting

By default the plugin will fetch Amazon Goldbox every 12 hours. In every attempt of fetching the plugin will display a notification like this:

"Fetching Amazon, please wait 5-10 minutes"

Whenever there is a new version of this plugin, you will see a notification on your Admin Dashboard. Just follow the instruction, the update progress is the same as other plugin, you just need to click the Update button. All your settings will remain intact.

To make sure this 1-click update feature works, you should not edit the Plugin name, Plugin URI and Plugin version.
