Non-hazardous statement

17. June 2014

Attention: Safety Data Sheet (SDS) Coordinators

This product is **considered neither to be nor to contain hazardous chemical** based on evaluations made by our company.

NOTE: A Safety Data Sheet (SDS) is not required for products and components classified as non-hazardous.

This document certifies in accordance with European Union Directives that ELISA Kits, antibodies, antigens, and turbidimetric products manufactured by AntibodyShop and BioPorto Diagnostics are CLASSIFIED AS NON-HAZARDOUS. No product contains any substances above the concentration limits triggering classification or mentioning in a safety data sheet, section 3.2.

Despite the classification as non-hazardous, we recommend carefully reviewing the product inserts/data sheets and using good laboratory practices such as avoiding unnecessary contact, immediately soak up and discard any spillage, and use of personal protective equipment (which may include chemical resistant gloves and lab coats) during the use of any laboratory reagent.

Please contact info@bioporto.com if you have any questions or need additional safety information. Thank you for your interest in our products and their safe use.

Disclaimer

The information and hazard status pertaining to AntibodyShop or BioPorto Diagnostics products are believed to be from reliable sources. However, the information is provided without any express or implied representation or warranty regarding its accuracy or correctness. Final determination of suitability and safe usage of products is the sole responsibility of the user who is obligated to review this data in the specific context of the intended use and determine applicability.

Various national or local agencies may have specific regulations concerning the transportation, handling, storage, use or disposal of this product, which may not be reflected in this statement. The user should review these regulations to ensure full compliance.
