

Our vision: Enable all children to reach their potential

Since opening our first lab school in 2013, our mission has been to make the best education the most available. We've made progress toward this goal by opening lab schools, co-developing a platform with educators and technologists, and partnering with forward-thinking schools.

Together, we're building a community dedicated to transforming education for all students.

2013

AltSchool Founded

Opened our first micro-school in San Francisco, and began developing our platform.

2014

Modeling Better Business

Became a B Corp and a public benefit corporation, voluntarily setting high standards for environmental responsibility, social contribution and accountability.

2015

Funding & Expansion

Raised additional funding to invest in the development of our platform, and opened our first school in New York.

2016

Partner Program Announced

Invited educators and schools to join our community and help improve education for all children. Reviewed applications from more than 200 schools and selected first partners.

2017

Partner Program Pilot

Onboarded first Year 0 partners to begin using the platform during the 2017-18 school year. Began consolidating lab schools to focus on two pre-K to 8 systems.
