Institute for Postgraduate Education

“Practical and Essential Facts to Manage Heartworm Disease, Tick-borne Disease, Intestinal Parasites, and Fleas and Mites”

When: Sunday, October 14, 2018 9AM-3:30PM

Where: Animal Medical Center, 510 East 62nd St. New York, NY 10065

RACE & NY STATE CE APPROVED

SPONSORED BY ZOETIS

Speaker: Jessica Rodriguez, DVM, PhD, DACVM (Parasitology)

- Dr. Rodriguez completed an internship in small animal medicine and surgery (University of Tennessee), practiced in SE Houston, TX, and completed graduate training and a parasitology residency under the National Center of Veterinary Parasitology.
- In 2017, she received her PhD, joined Zoetis as a Field Specialist in Parasitology, and achieved Diplomate status in the American College of Veterinary Microbiologists with a subspecialty in Parasitology.

Lecture Topics:

- What’s new in canine heartworm disease: Diagnosis, treatment, prevention
- Back to basics – feline heartworm disease
- High alert for tick-borne disease: Everything you need to know
- Efficient management of fleas and mites
- Intestinal parasites in dogs and cats: What’s new, what’s underrecognized, and what can we do differently?
