Our Mission

Founded in 1979, the AAA’s Mission is: “To promote health care policies that ensure excellence in the ambulance services industry and provide research, education and communications programs to enable its members to effectively address the needs of the communities they serve.” The American Ambulance Association represents ambulance services across the United States that participate in serving more than 75% of the U.S. population with emergency and nonemergency care and medical transportation services. The AAA was formed in response to the need for improvements in medical transportation and emergency medical services. The Association services as a voice and clearinghouse for ambulance services across the nation. The Association views prehospital care not only as a public service, but also as an essential part of the total public health care system.

Our Vision

The AAA has a proven track record for working with federal agencies and law makers to shape legislation that helps optimize revenue and reduce regulatory burdens for the entire EMS industry. Partnering with the AAA lets your customers know you are like minded in your mission to provide business solutions that allow ambulance professional to focus on the business of excellent patient care.
