

AMERIGLO® INSTALL TOOLS

REMOVE, INSTALL, OR ADJUST ANY IRON SIGHT FOR ALL GLOCK® MODELS

The AMERIGLO® GTool removes, installs, and adjusts any rear sight on every GLOCK® pistol. The tool works for all Generation models (1–6), including MOS and Slimline slides. The new design is capable of installing the tallest backup sights on the market—up to .600" overall height. The slide clamp shoe fully supports the slide, as the fine-thread shaft precisely adjusts the sight, and the 3/16" custom front sight tool works with all Glock pistol models.

ANGLE-SIDED BLOCK

For sights with angle-sided base.

STANDARD SPACERS

For all GLOCK® pistols except G42.

SLIDE CLAMP SHOE

For all GLOCK® pistols except Slimline.

STRAIGHT-SIDED BLOCK

For sights with straight-sides.

SLIDE CLAMP SHOE/SPACERS

For Slimline pistols (42,43,48).

3/16" FRONT SIGHT TOOL

Designed specifically for Glock® front sight screws. Included in GTOOLKIT.
