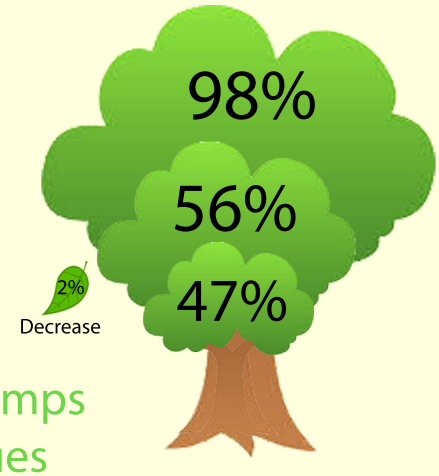
MESH and Your Camp:

The question isn't IF it will effect your staff, it is WHEN.

56% of the 215 camps polled believe there was an increase in frequency of MESH issues among STAFF in the last 2 years.

\+

Another 47% said MESH frequency in STAFF has stayed the same....



"Soooo...What you are saying is that according to the camps polled, 98% report that instances of MESH related issues among staff have maintained or gone up?

YEP!

When asked to chose the TOP 3 MESH areas camps felt challenged to address with their STAFF - Anxiety/Stress won out.

When asked "What is it about the camp experience that you think creates a supportive environment for campers & staff with MESH Concerns?"
Camp Leadership mentioned all these words:

Of the 215 camps polled:

Overnight vs Both Day/Overnight vs Day

What is YOUR camp doing to address MESH issues among staff?
