North Carolina Opioid Statistics

*Data are preliminary and subject to change

Source: NC Division of Public Health, Epidemiology Section, NC DETECT, 2012-2021

Detailed technical notes on all metrics available from NC DHHS

*Heroin and/or Other Synthetic Narcotics (mainly illicitly manufactured fentanyl and fentanyl analogues); *Commonly Prescribed Opioid Medication

Source: Deaths-N.C. State Center for Health Statistics, Vital Statistics, 1999-2019; limited to N.C. residents

North Carolina's Opioid and Substance Abuse Action Plan

Equity and Lived Experiences at the Center:

Prevent

- Prevent future addiction and address trauma by supporting children and families

Reduce Harm

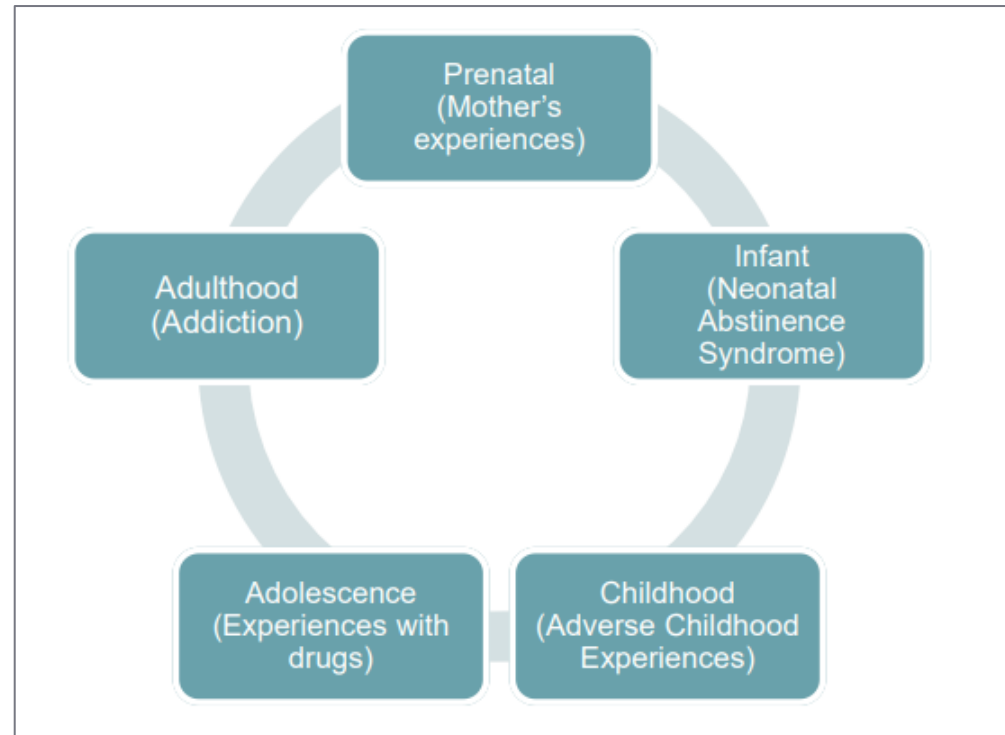

- Move beyond only opioids to address polysubstance use

Connect to Care

- Increase treatment access for justice involved people, expand access to housing and employment supports, and recover from the pandemic together

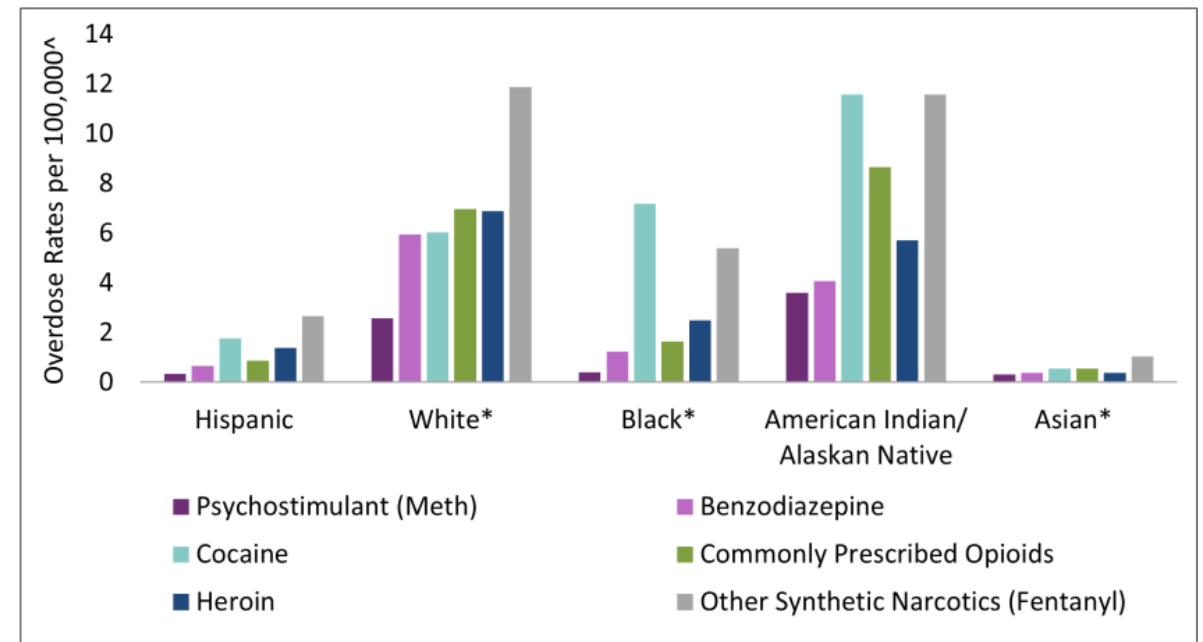

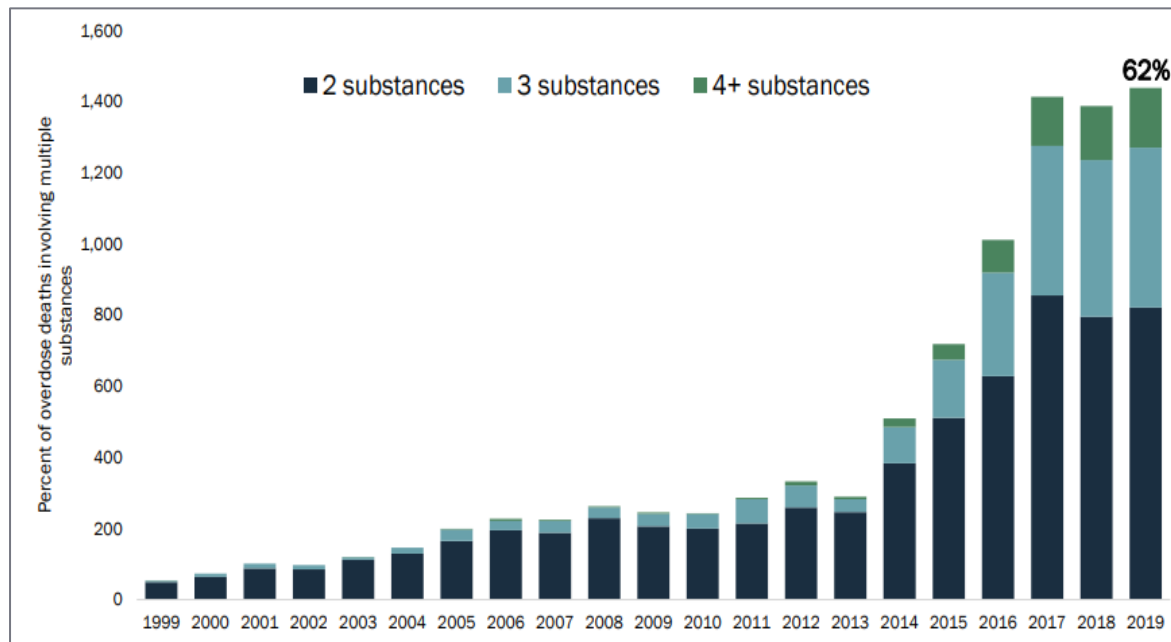

North Carolina's Opioid and Substance Abuse Action Plan - Prevent

- The epidemic is part of an intergenerational cycle of trauma and harm

North Carolina's Opioid and Substance Abuse Action Plan – Reduce Harm

- Most overdose deaths now involve multiple substances
- Overdose trends vary by race/ethnicity

North Carolina's Opioid and Substance Abuse Action Plan – Reduce Harm

North Carolina's Opioid and Substance Abuse Action Plan – Connect to Care

- An estimated **89% of people do NOT receive** the substance use disorder treatment they need
- People are **40 times more likely to die of an overdose** in the 2 weeks post incarceration than the general population

North Carolina's Opioid Action Plan
