AGL Technology, LLC is proud to present the Emergency Automatic Gunshot Lockdown System. This new and innovative system was designed in part by the Department of Energy to protect innocent citizens, buildings and other critical infrastructure from random shooting incidents. The EAGL system will detect firearm discharges, automatically lock down buildings and other soft target areas based on predetermined scenarios and direct the IP Camera management system to record the suspect while automatically sending the image to first responders.

SDI Presence LLC is an IT managed services provider (MSP) that leverages its strong team presence to provide industry-leading IT services while advancing our clients to a secure digital enterprise. SDI offers over 20 years of aviation experience, delivering strategic managed services, IT consulting and hybrid infrastructure solutions to airports throughout the US. SDI’s resume includes deploying comprehensive IT systems in live airport environments with no disruption to airport operations or unplanned downtime. SDI’s hybrid of security and IT professionals are versed in aviation standards including Transportation Security Agency (TSA) Regulations (TSARs) parts 1542 and 1544 and FAA Regulations (FAR) 139; the firm is an active member of aviation and technology industry groups including ALEAN, ACI, AAAS, and ASIS – all of which informs the firm’s trusted advisory services for its portfolio of aviation clients. Visit us at www.sdipresence.com and connect with us on Twitter and Instagram.

At Segway, we’re simplifying things. We deliver innovative and energy conscious law enforcement and private security products. Riders and officers can simplify their work week by leveraging superior design and dramatically improving mobility and efficiency throughout indoor and outdoor areas. Supervisory and patrol teams are fully empowered to improve transit speed.

Shooter Detection Systems is focused on saving lives through the use of proven, military-grade technology. Developed in conjunction with the Defense Advanced Research Projects Agency and a major defense contractor, SDS gunshot detection systems utilize the most advanced and proven shooter detection technologies available in the commercial market. The Guardian Indoor Active Shooter Detection System is SAFETY Act Certified and Designated as Qualified Anti-Terrorism Technology by the U.S. Department of Homeland Security and approved for UK Government use by the Centre for the Protection of National Infrastructure (CPNI). SDS has worldwide customers with gunshot detection product installations in entertainment facilities, airports, schools & universities, healthcare facilities, Fortune 500 corporations, municipal buildings, court systems, major utilities, manufacturing plants, high-rise office buildings, and government and private buildings.

SSI is an airport WOSB – Women-Owned Small Business certified vendor. Since 2004, SSI has become the leading provider of safety and security training, and regulatory compliance consulting services to the aviation industry. They have experience with small, medium, and large hub airports as well as general aviation airports. Their market advantage is simply developing the most affordable, comprehensive and appropriate programs to meet our client needs.
