How to Use This Book iii

Acknowledgements vii

1 Basic Techniques for Solving Equations 1
1.1 Isolation . . . 1
1.2 Substitution . . . 6
1.3 Elimination . . . 9
1.4 Larger Systems of Linear Equations . . . 14
1.5 Summary . . . 19

2 Functions Review 24
2.1 Function Basics . . . 24
2.2 Graphing Functions . . . 32
2.3 Composition . . . 39
2.4 Inverse Functions . . . 43
2.5 Summary . . . 49

3 Complex Numbers 54
3.1 Arithmetic of Complex Numbers . . . 55
3.2 The Complex Plane . . . 61
3.3 Real and Imaginary Parts . . . 65
3.4 Graphing in the Complex Plane . . . 70
3.5 Summary . . . 74

4 Quadratics **79**
4.1 Factoring Quadratics . . . 79
4.2 Relating Roots and Coefficients . . . 84
4.3 Completing the Square . . . 88
4.4 The Discriminant . . . 96
4.5 Quadratic Inequalities . . . 99
4.6 Summary . . . 102

5 Conics **106**
5.1 Parabolas . . . 107
5.2 Problem Solving With Parabolas . . . 118
5.3 Maxima and Minima of Quadratics . . . 121
5.4 Circles . . . 126
5.5 Ellipses . . . 129
5.6 Hyperbolas . . . 142
5.7 Summary . . . 156

6 Polynomial Division **162**
6.1 Polynomial Review . . . 163
6.2 Introduction to Polynomial Division . . . 166
6.3 Synthetic Division . . . 177
6.4 The Remainder Theorem . . . 185
6.5 Summary . . . 189

7 Polynomial Roots Part I **193**
7.1 The Factor Theorem . . . 193
7.2 Integer Roots . . . 198
7.3 Rational Roots . . . 206
7.4 Bounds . . . 212
7.5 Graphing and the Fundamental Theorem of Algebra . . . 215
7.6 Algebraic Applications of the Fundamental Theorem . . . 219
7.7 Summary . . . 225

8 Polynomial Roots Part II **230**
8.1 Irrational Roots . . . 230
8.2 Nonreal Roots . . . 239
8.3 Vieta's Formulas . . . 244
8.4 Using Roots to Make Equations . . . 253
8.5 Summary . . . 256

9 Factoring Multivariable Polynomials **261**
9.1 Grouping . . . 261
9.2 Sums and Differences of Powers . . . 268
9.3★ The Factor Theorem for Multivariable Polynomials . . . 277
9.4 Summary . . . 282

10 Sequences and Series **286**
10.1 Arithmetic Sequences . . . 286
10.2 Arithmetic Series . . . 292
10.3 Geometric Sequences . . . 298
10.4 Geometric Series . . . 302
10.5 Sequence, Summation, and Product Notation . . . 313
10.6 Nested Sums and Products . . . 325
10.7 Summary . . . 331

11 Identities, Manipulations, and Induction **338**
11.1 Brute Force . . . 338
11.2 Ratios . . . 343
11.3 Induction . . . 348
11.4 Binomial Theorem . . . 358
11.5 Summary . . . 365

12 Inequalities **371**
12.1 Manipulating Inequalities . . . 371
12.2 The Trivial Inequality . . . 378
12.3 AM-GM Inequality with Two Variables . . . 384

Copyrighted Material

12.4 AM-GM with More Variables . . . 389
12.5 The Cauchy-Schwarz Inequality . . . 392
12.6 Maxima and Minima . . . 400
12.7 Summary . . . 406

13 Exponents and Logarithms 413
13.1 Exponential Function Basics . . . 413
13.2 Introduction to Logarithms . . . 416
13.3 Logarithmic Identities . . . 424
13.4 Using Logarithm Identities . . . 433
13.5 Switching Between Logs and Exponents . . . 441
13.6 Natural Logarithms and Exponential Decay . . . 444
13.7 Summary . . . 451

14 Radicals 456
14.1 Raising Radicals to Powers . . . 456
14.2 Evaluating Expressions With Radicals . . . 465
14.3 Radical Conjugates . . . 470
14.4 Summary . . . 473

15 Special Classes of Functions 476
15.1 Rational Functions and Their Graphs . . . 476
15.2 Rational Function Equations and Inequalities . . . 486
15.3 Even and Odd Functions . . . 492
15.4 Monotonic Functions . . . 497
15.5 Summary . . . 503

16 Piecewise Defined Functions 508
16.1 Introduction to Piecewise Defined Functions . . . 508
16.2 Absolute Value . . . 517
16.3 Graphing Absolute Value . . . 523
16.4 Floor and Ceiling . . . 529
16.5 Problem Solving with the Floor Function . . . 535
16.6 Summary . . . 539

Copyrighted Material

17 More Sequences and Series **544**
17.1 Algebra of Recursive Sequences . . . 544
17.2 Telescoping . . . 552
17.3 Sums of Polynomial Series . . . 561
17.4 Arithmetico-Geometric Series . . . 567
17.5 Finite Differences . . . 571
17.6 Summary . . . 576

18 More Inequalities **581**
18.1 Mean Inequality Chain . . . 581
18.2 The Rearrangement Inequality . . . 593
18.3 When Formulas Fail . . . 600
18.4 Summary . . . 606

19 Functional Equations **611**
19.1 Finding Values . . . 611
19.2 Finding Functions with Substitution . . . 615
19.3 Separation . . . 619
19.4 Cyclic Functions . . . 621
19.5 Summary . . . 627

20 Some Advanced Strategies **631**
20.1 Symmetry . . . 631
20.2 Substitution for Simplification . . . 638
20.3 Method of Undetermined Coefficients . . . 644
20.4 Constructing Polynomials From Roots . . . 649
20.5 Common Divisors of Polynomials . . . 655
20.6 Symmetric Sums Revisited . . . 658
20.7 Summary . . . 665
