

Pitch Deck

Overview

WELCOME

A well-done pitch deck can be the difference between getting investors hooked and getting stiff-armed out of the boardroom. Let our team build you a deck that will get investors excited about what you're doing, and instill FOMO in everyone who sees it.

What You'll Get

Dedicated Consultant

One of our Startup Consultants will conduct a strategy call to learn more about your business, then work with you personally to guide you through each step of the process until your business plan is in your hands and ready to ship.

Overall Pitch Strategy

We'll customize the content and organization of your deck based on your company and your goals, using formats and techniques that we know to be successful.

Original Messaging

Professional copywriting to ensure that your deck sends the right message to the right audience. Catering your deck to investors? Potential partners? Industry players? We'll make sure they feel the messaging is targeted directly at them.

Custom Design

Professional design work to make sure your deck is polished and engaging. Great design is vital to a pitch deck, and you only have one shot to impress. We'll use the assets you already have, combined with those we create, to ensure we stay on-brand and leave viewers asking for more.

Accelerator Roadmap

Our team is here to make your raise a lot less stressful. We'll equip you with the right tools, resources, and confidence to present your company to investors in the best light. Between your dedicated Consultant and our Startups.com team, you'll have an arsenal of help to guide you through your campaign whether it's your first or fiftieth time raising capital.
