“Those who cannot be cured by medicine can be cured by surgery. Those who cannot be cured by surgery can be cured by heat. Those who cannot be cured by heat are to be considered incurable.”

**Think of your  
blood vessels  
as highways.**

**If your blood vessels are blocked, your health and wellness are compromised.**

The importance of microcirculation's contribution to GOOD HEALTH is becoming more understood. Usually when people think about circulation they focus on the heart, veins and arteries, not the **capillaries** and the importance they play in overall health.

**We have approximately  
100,000 miles of blood vessels  
in our bodies...**

**Around 74% of them support  
microcirculation.**

# WHAT THE AVACEN DOES

Uses a patented process to increase microcirculation by applying thermotherapy and negative pressure to either palm to systemically (all over) treat the entire body.

## HOW THE AVACEN WORKS THROUGH THE PALM OF YOUR HAND

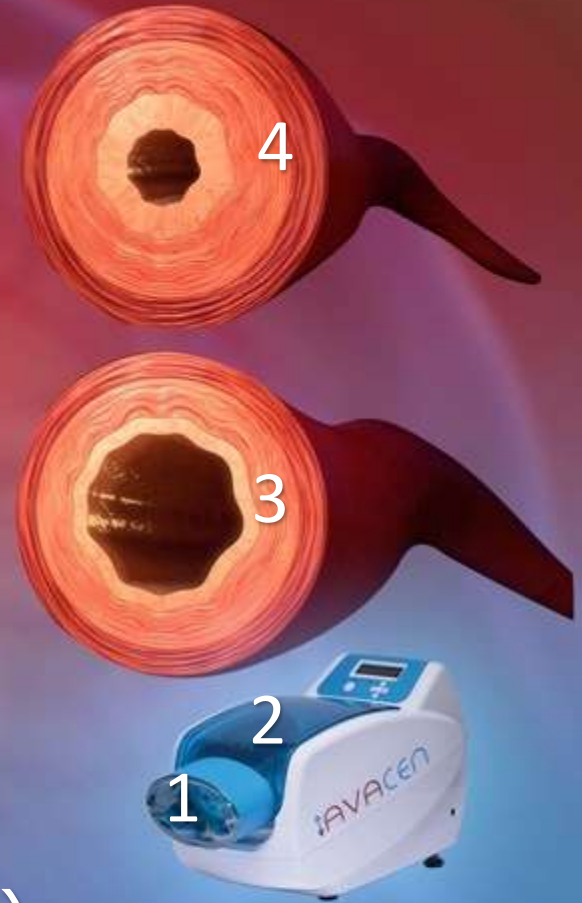

The Arteriovenous Anastomosis (AVA), is LOCATED IN THE PALM of your hand. Through the AVA, the AVACEN device manages the safe and continued infusion of heat into the circulatory system.

When you put your hand into the negative pressure chamber (1) & rest your palm on the heating element, (2) the negative pressure in the chamber maintains vasodilation (a widening of the vessels) (3) and prevents vasoconstriction (4).

This creates a larger pool of blood to warm while preventing the vascular system from constricting.

At about 7 to 8 minutes the body cools the warmed blood by vasodilating the peripheral capillaries resulting in increased blood flow.

Before the treatment

After approximately 20 minutes\*

\* This may not be typical

The heating element warms the blood in the palm. The device has over 4000 computer instructions and multiple sensors regulating what is occurring in palm of the hand –  
*Never allowing it to overheat.*

Without negative pressure, the vascular bed would vasoconstrict reducing the distribution of warmed blood pool from the palm.

Heating thins the blood increasing delivery to the cells and reducing blood pressure.
