You will have to set up Pokemon Go exactly as you would set it up on a standard Android or iOS device.

All iPhone (iOS) users can easily install and use iSpoofer. When the map is locked, you can click anywhere

and simulate a walk, run or teleport path. Step 6: Next, run the application downloaded from the site. 3. It will launch a Maps Application. 1. Open BlueStacks App and launch and application except "Pokemon GO" and you'll find a navigation bar at the bottom of the window.

Search for "Pokemon GO" and download the app by Niantic, Inc. Once the downloading is done, you're all set for the next process. If you're dead set on playing Pokemon Go but live in a barren region, you will need three things: a GPS spoofing app, a mock locations masking module, and a VPN. Now it's time to begin playing! It seemed like a waste of time. Soft Bans occur if in a short time you move to a very far location.

One of my 7 day bans ended yesterday and this morning I opened the game and it gave me a 30 day ban. Update: PC Emulators are leading to permanent ban after the latest Safety net update. I would strongly suggest you to follow our Pokemon GO hack for Android or iOS device which are 100% working and have very less ban rate. Although it seems there's another story/ban to read about every day for the iOS spoofer..

I must say right off the bat that I do not condone or advocate using cheats in Pokemon Go whatsoever because it can and will likely lead to your account being banned, erasing all of the hard work you've put into the game over the years. In this article, we'll guide through the process of using Pokemon GO on PC i.e Windows and Mac.
