EtherCAT Products

Drives for EtherCAT Networks

Product Features

- Stepper and StepSERVO drives with built-in EtherCAT communications
- EtherCAT network control using CANopen over EtherCAT (CoE) adhering to CiA 402
- Support for Profile Position, Profile Velocity, and Profile Torque (StepSERVO only) modes
- Support for Cyclic Synchronous Position (CSP) and Cyclic Synchronous Velocity (CSV) modes
- Support for multiple Homing modes
- Applied Motion Products-specific objects for running stored Q Programming segments

☰

Series Details

Series Details:

Applied Motion Products offers the stepper and StepSERVO drives above with built-in EtherCAT network communications. EtherCAT is a popular and powerful standards-based industrial Ethernet protocol specifically designed for high-speed motion control and automation tasks.

Applied Motion drives with on-board EtherCAT – designated by “EC” in the model number – support CANopen over EtherCAT (CoE) operating modes including Profile Position, Profile Velocity, Profile Torque (StepSERVO only), Cyclic Synchronous Position (CSP), and Cyclic Synchronous Velocity (CSV). All drives support a range of Homing modes as well.

Why EtherCAT?

EtherCAT is an Ethernet-based fieldbus system suitable for real-time communications requirements in automation technology. It provides short data update times and low communication jitter over a full-duplex Ethernet physical layer. All of this is to say that it's a high performance industrial Ethernet network for automation.

Stored Program Execution

Applied Motion provides specific CANopen objects for executing Q programs stored in a drive's non-volatile memory. *IMPORTANT: Note that stored Q programs in an EtherCAT drive can only be accessed via the EtherCAT network by request from the master controller. These drives cannot run Q programs stand-alone.*

Master Controllers

EtherCAT networks are controlled by a master controller and there are numerous suppliers. We offer support documentation to assist users in connecting to several of the more popular controllers. Visit the [EtherCAT Master Controllers](#) [35] page for more details.

* Closeout priced products are highlighted in green.

Title	Type	Description	1pc.
SS03-EC-D	StepSERVO Drive	StepSERVO Drive with EtherCAT, 3 A	\$476.00
SS05-EC-D	StepSERVO Drive	StepSERVO Drive with EtherCAT, 5 A	\$476.00
SS10-EC-D	StepSERVO Drive	StepSERVO Drive with EtherCAT, 10 A	\$476.00
STF03	Stepper Drive	DC Advanced Microstep Drive w/ Multi Fieldbus options	\$185.00
STF06	Stepper Drive	DC Advanced Microstep Drive w/ Multi Fieldbus options	\$198.00
STF10	Stepper Drive	DC Advanced Microstep Drive w/ Multi Fieldbus options	\$211.00
