GENERAL INFORMATION

CapSil® is a new generation surfactant based on organo-modified silicone technology for use in water-based pesticide formulations. CapSil® is a highly effective non-ionic spray adjuvant. Careful observation of spray application is recommended to determine proper and efficient pesticide application. Read CAUTION statements carefully before use.

While CapSil has been proven to be a highly efficient spray adjuvant, the user, timing, weather conditions, methods of application, crop conditions, and/or mixture with other chemicals, not specifically recommended, are beyond the control of the seller. Therefore, the user should carefully observe spray deposits, concentration and rate efficiencies, compatibilities, and effectiveness in initial application and adjust the adjuvant rates accordingly. Proper trials on any anticipated new combination and uses are strongly suggested. Trial applications should be repeated at least twice in a 7-day interval and observed 7 days after each application during the trial period.

CapSil may be used on forestry, turf, ornamental, industrial, structural and non-structural sites.

DIRECTIONS FOR USE

Pesticide manufacturers may recommend a specific concentration or rate of a specific nonionic surfactant to be used with their product. Follow the pesticide or active ingredient label recommendations on use of surfactant. However, if no such recommendation is on the label, consult the pesticide manufacturer or the local agricultural university. Do not add water to the contents of this container. Store in original container and pour into rinse tank. Do not reuse container. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit www.acercycle.org. Dispose of contents/container in accordance with local/national regulations.
