Suncoast Seminar For Optometry

Hotel Information

The Hyatt Regency Clearwater Beach Resort & Spa is a new luxury resort opened in February 2010. Experience world-class style and amenities just steps from the powder white sands of Clearwater Beach.

Directions: From Tampa, take State Road 60 west all the way to Clearwater Beach. At the roundabout, take the fourth exit which will take you south onto Coronado Blvd. The resort is less than 1/4 mile on the right.

Faculty/Course Descriptions

Nandesh N. Patel, M.D.,

Interpretation of the OCT in Age-Related Macular Degeneration

Age-related macular degeneration is the leading cause of visual loss in the United States' senior population. Early diagnosis is essential to avoid the catastrophic decline in vision that often accompanies development of exudative macular degeneration. Optical coherence tomography both complements and supplants the traditional imaging modalities of angiography.

Michael H. Manning, M.D., F.A.C.S.

Spotlight on Anterior Segment Innovations in Eye Care

An update in the ever-changing field of eye care focused on anterior segment specialty areas. It will include discussions on innovations in Meibomian gland dysfunction, corneal crosslinking, refractive surgery, and more.

Michael Bacigalupi, O.D., M.S., F.A.A.O.

Marketing and Practicing in the World of Millennials

Millennials are a segment of the population born between 1980 and 2000. Like all generations before, they are different. We now live in their world. We text, we have Facebook pages, we read e-books, and our cars tell us how to get to different destinations. As ODs, our marketing strategies have to adapt to this new world. No longer are Yellow Pages ads the way to go. We also have to change the way we practice. We have to be more efficient and more cost effective in everything we do. Welcome to the world of Millennials!

Thomas I. Porter, O.D., F.A.A.O.

What Every Eye Doctor Must Know about Low Vision

Every eye doctor has a patient for whom changing their glasses won't help and there's no pathology to treat. So, what do you do? Here are ways to help low vision patients from the perspective of the eye doctor who really doesn't want to provide comprehensive low vision services but still wants to help his or her patients.

Jasmine Mohadjer, M.D.

A Review of Common Oculoplastic Conditions: Evaluation and Management

This presentation will describe in detail common periorbital findings and disorders often first seen by the optometrist. The discussion will include a review of anatomy, evaluation, diagnosis, and surgical management of typical eyelid and orbital conditions.

Albert D. Woods, O.D., M.S., F.A.A.O.

Prevention of Medical Errors and the Optometric Practice

Different types of medical errors are presented including root cause analysis, error reduction, and future prevention that may be useful within a primary optometric eye care setting. Also presented are situations where a medical error can sometimes lead to medical malpractice.

Alice Sterling, O.D.

Optometric Jurisprudence

A review of the laws and rules regulating the practice of optometry in Florida. There will be an opportunity for questions.
