About CEwire2023

CEwire2023 is the largest continuing education conference in eye care.

With **60 COPE-Accredited credits**, each given at **all the interactive /**

synchronous events (and available on demand!) there is no easier or less expensive way for you to meet your CE requirement! Over **18,000 ODs** have attended our online events.

Agenda

Visit the CEwire2023 web site to [view the conference agenda](#). This year's show has even more diverse speakers and subjects. Based on attendee feedback, we've dedicated more hours to **glaucoma** and **narcotics**, since more states are requiring several hours of these topics for relicensure.

Integration with ODwire.org !

In 2022, we completely re-wrote CEwire software to **improve interactivity**. Many of ODwire.org's features are now built into the CEwire software itself!

This year, all registrants will receive **immediate access** to the **[CEwire2023 Private Forum](#)**, where attendees and speakers can interact with each other.

The forum provides you with a **private and secure space** where you can:

- Ask questions before, during, and after the event

- Interact with & get to know your fellow attendees

- Peruse vendors discounts, and discuss their products and services with experts from each company

The forum acts as a permanent repository that you can always return to in the future -- **even months or years after the conference has concluded**!

We also now have a **dedicated file repository** for ancillary materials associated with each lecture, and a permanent **[certificate and transcript](#)**

center, so you can always download proof of attendance any time in the future.

No other conference gives you this sort of **long-term access to information**.

Hope to See you There!

We hope you've found the past shows useful & we look forward to seeing you at this year's event.

If you have any comments about the show or ideas for the future, don't hesitate to **reply to this email**.
