

4 Hour COPE-Approved Live Interactive Webinar With No Test **Featuring Dr. Blair Lonsberry, OD and Dr. Julie Tyler, OD**

SUNDAY AUGUST 29, 2021 | 1:00 PM - 5:15 PM EDT

PROGRAM AT A GLANCE

Clinical Ocular Grand Rounds

Blair Lonsberry, OD, FAAO

Critical to a clinician's practice is the ability to diagnose and manage unique and interesting presentations of typical ocular conditions or to be able to diagnose a previously unencountered condition. This interactive course will present patient cases with unique presentations of ocular conditions, including special testing. This course will focus on the clinician's ability to analyze and interpret the unique case presentation and provide appropriate management and treatment options.

COPE ID Pending - 1 Hour

Diagnosing and Managing Ocular Emergencies and Urgencies

Blair Lonsberry, OD, FAAO

Ocular emergencies are inherently unpredictable requiring the clinician to be able to think on their feet, while triaging and managing the patient. Utilizing the latest in interactive technology, this course will review the various presentations of ocular urgencies and emergencies focusing on triaging, case history and key points in diagnosing various emergent conditions. Up to date treatment and management plans will be discussed in detail, focusing on current therapeutic treatments.

COPE ID Pending - 1 Hour

Pain Management in Optometric Practice in an Era of Opioid Abuse

Blair Lonsberry, OD, FAAO

Ocular pain is an important reason why patients seek care, especially on an emergent basis. The following interactive presentation will use a case-based approach to explore the most effective means to manage pain in optometric practice, including the importance of understanding addiction and the current opioid abuse epidemic. Oral pain management will be discussed with particular emphasis on the appropriate steps in prescribing oral pain medications.

COPE ID 73444-PH - 1 Hour

Uveitis: Case-Contemplations and Review

Julie Tyler, OD, FAAO

Uveal inflammation can present with significant ocular findings and is often associated with systemic conditions that have a range of consequences to the human visual system. Proper early identification of anterior uveitis presentations dramatically increases the likelihood of a favourable patient outcome. Clinical characteristics of uveitis will be reviewed, as well as discussion of some presenting infectious and non-infectious related systemic associations with included testing indications and recommendations. Additionally, literature findings associated with uveitis will shed light on diagnosis and management issues and will be reviewed in this presentation.

COPE ID 73458-AS - 1 Hour

This Activity is accredited by COPE for continuing education for Optometrists.*

Canadian Optometrists: \$79 + \$10.27 HST = \$89.27 CA\$

USA Optometrists: \$59 US\$

Meet Our Faculty

Dr. Blair Lonsberry obtained his Optometry Degree from the University of Waterloo after completing a Master of Science in Physiology from the University of Manitoba. He completed his residency in Primary Care Optometry from the Illinois College of Optometry, then joined the faculty at Southern College of Optometry in Memphis, Tennessee. During his time at Southern College of Optometry, he completed a Masters in Education Degree with an emphasis in adult learning. Currently, Dr. Lonsberry is a Professor at Pacific University College of Optometry in Forest Grove, Oregon.

Dr. Julie Tyler received her BA in Psychology and Biology from Creighton University and her Doctor of Optometry Degree from Indiana University School of Optometry. Following graduation, Dr. Tyler completed a Residency at Nova Southeastern University (NSU) and served as Chief Resident prior to joining the faculty at NSU full-time. More recently, Dr. Tyler joined the faculty at Southern California College of Optometry at MBKU where she has been promoted to an associate Professor.

WORLD COUNCIL OF OPTOMETRY

AOE is a proud supporter of global optometry and is now an Affiliate Member of the World Council of Optometry.
