

The bifold doors entering the bathroom could be changed to pocket door or even a smaller entry if the design needs it.

SHOWER

This is the area that we are very open to suggestions - be it rectangular, oblong, corner or wet room design.

Included in the design we would like

- Inserts to store bath products
- At least two shower heads - regular shower head/or hand held and rain head
- A seat would be nice but not necessary
- Body jets would be nice but not necessary

The following are some inspiration pictures we found.

Like the tile details in the insets for the soap/shampoo

Really like that storage is hidden from plain view and a seat

Seat formed from tub deck

seat and separation wall

corner seat

We like how the body jets are plumbed into the back wall with the two glass pieces and the towel rack just outside the door

Love all the textures in this bath, and distressing/antiquing on the cabinetry

corner shower and bench

wet room

TUB

We need a tub. It can be stand alone or drop in.

The following are some baths/tubs that we liked.

Like the tub on the angle

Love the geometric pattern in the curtain and the wood tub deck
