BORG-WARNER CORP.

Amendment to Filing of Petition for Food Additive

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409 (b) (5), 72 Stat. 1786, 21 U.S.C. 348 (b) (5)), notice was given in the FEDERAL REGISTER of November 29, 1974 (39 FR 41569) that a petition (FAP 5B3051) had been filed by Carr, Bonner, O'Connell, Kaplan and Thompson, 900 Seventeenth St. NW., Washington, DC 20006, on behalf of Borg-Warner Corp., proposing that the food additive regulations (21 CFR Part 121) be amended to provide for safe use of an acrylonitrile/butadiene/styrene copolymer in contact with food other than carbonated beverages.

The petition now proposes that such regulation also provide for safe use of the acrylonitrile/butadiene/styrene copolymer in the manufacture of bottles intended to hold carbonated beverages.

An environmental impact analysis report has been submitted by the petitioner. Copies of the report are available in the office of the Assistant Commissioner for Public Affairs, Rm. 15B-42 or the office of the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852.

The Commissioner of Food and Drugs announced the need for issuance of an Environmental Impact Analysis Statement for FDA actions on substances used or intended for use in the fabrication of plastic bottles for carbonated beverage and beer use. This announcement in the FEDERAL REGISTER of September 7, 1973 (38 FR 24391) required the submission of Environmental Impact Analysis Reports (EIAR) for such articles. The EIAR for this petition and others submitted in response to this notice are being reviewed for issuance of a Draft Environmental Impact Statement.

Meanwhile, the petition is being reviewed regarding proposed safe use of the additive in fabricating bottles intended to hold carbonated beverages.

REGULATORY GUIDE

Issuance and Availability

The Atomic Energy Commission has issued two new guides in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the AEC Regulatory staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 5.39, "General Methods for the Analysis of Uranyl Nitrate Solutions for Assay, Isotopic Distribution, and Impurity Determinations," describes acceptable methods for the analysis of uranyl nitrate solutions. This guide references the ASTM Standard C-799, "Standard Methods for Chemical, Mass Spectrometric, Spectrochemical, Nuclear, and Radiochemical Analysis of Nuclear-Grade Uranyl Nitrate Solutions." Regulatory Guide 5.40, "Methods for the Accountability of Plutonium Dioxide Powder," describes methods for the sampling, subsampling, sample handling, dissolution, chemical and isotopic analysis, and error analysis of plutonium dioxide powder.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed (listed below) or (2) improvements in all published guides are encouraged at any time. Public comments on Regulatory Guides 5.39 and 5.40 will, however, be particularly useful in evaluating the need for an early revision if received by March 17, 1975.

Comments should be sent to the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C.
